INTRODUCTION

Positive Living Will Boost Your Immunity-Think Positive Be Positive Stay Strong is a very unique book on positive living and positive thinking. Positive living has certainly some positive factors within us that keep us happy and there is something negative within us also which keep us unhappy. Happy living through positive and good thoughts, is nothing more than that of living a normal life free from undue pressures, problems and tensions.

If we want to live a good and happy life then we need to get rid of the negativity within us which makes us unhappy. Negative approach always complicates the problems and increases unhappiness. Most of us do the fatal mistake of looking outwards for happiness rather than looking inwards. Be positive, be strong, be bold and be courageous you are sure to find the feeling of happiness within you. Even if we are having a bad day, think of some good things that may come our way, either later that day, tomorrow, next week, or next moment. When everything seems to be beyond our control, it's almost too easy for us to slip into the grasp of negativity and unhappiness. To avoid sadness we must strive to abolish this sort of thinking through the power of thinking positively and generate the feeling of happiness within us.

The art of sweet living is not a complicated kind of art difficult to learn rather a simple art of happy living feeling well, eating well, and thinking well. What we need to do is just to tune up our mind to enjoy every moment of life and let the sweet happiness follow us. This is something that needs to be looked into thoroughly. We need to focus on the positive aspects of lives, rather than on the negative setbacks and enjoy every moment of life happily and merrily. Enjoy your life with cheerful talks. Be happy and cheerful.

We must remember that happy living is the reward of sweet and positive thinking. We ought to remember, only the positive thinking can bring happiness in our lives. If we cannot think positively, you cannot live happily. Be our own teacher or adviser we ought to look everything with a positive angle. Let us find something good even in most critical moments of our life and let us make positive thinking the basis of our happy living.

It's a matter of thought that fools worry about the circumstances on which they have no control. The wise live on positive good and happy thoughts. A sound and positive happiness is all around. It's not far away from us. If we do not want to live happy, it's up to us. It's our own choice. We must not blame others, nor should we blame our fate or external circumstances. Another thing is that feeling confident affects the way we perceive our situations and how we decide to manage them. Think that by being more optimistic we alter our approaches to situations and take on them in a healthier manner; we think of alternatives and act according to better outcomes. All our efforts lead us to good and happy living. If we think we are positive and happy, it will be positive. It does not say to stick our heads in the soil; rather it says to think positive. Interestingly it does not say feel positive it says think positive and that is the real meaning to remain happy. Positive thinking, good and happy thoughts make us to live happily.

Happiness does not come alone, it adds our minds body and soul to remain in constant touch with each other. We have to remove negative thoughts and create an atmosphere to be happy in our lives. There are many fear factors that are reasoning us to be unhappy and the main reason being that our heart and our feelings which are more susceptible to fear and worry than the mind. We do the worrying in our minds but it is our emotions that make us more worried not our brains. When the heart senses the possibility of loss it can start panicking and then uses the mind to worry and many times tries to manipulate the brain in dealing with the fear.

The heart desires something and gets excited about it and then it manipulates the mind to assure that it will get it. Although the brain can control the emotions and knowledge can proceed all. However when it comes to response time the brain is slower than the emotions. That is which explains why we say or do things and then regret them. It would be very hard to tell someone who is worried to feel happy. But if you tell him to think positive that is something even a worried person can do.

We need to use our mind to think to be happy and positive. Our objective in life should be to train ourselves to wait for the brain to show up before we say or do anything. Fear usually comes from the emotions and thinking positive is something the brain is capable of doing, making happy living as the key to success.

Just think of sweet and happy living. This simple task can be done by thinking positive as it brings positive results in its wake; when you react in a positive way to a negative situation you usually get positive in return and the feeling of happiness is born in you. Positive mental attitude is effective in many ways.

There are limits to the effectiveness of positive and happy thinking. Do we try to assume that the persons who are not treating us the way we should be treated are themselves in pain and needs our love and advice to be happy in life and lead a good, sweet and happy life? It is therefore a must for us to learn and understand that we need to be positive first and we must think to be happy in the interest of our sweet and happy living.

You need to clear your desk of all papers except those relating to the immediate problem at hand. When you face a problem, solve it then and there, if you have the facts to make a decision. Make a decision fast and do not linger on. Learn to organize, deputize, and supervise and straight away come to decision. Therefore write down a list of things that make you excited, however big, small, likely or unlikely. Then work to make them occur more often. Look for moments of joy and savor them. Recognize your good happening every day.

Eat well do plenty of exercise and do not skip meals.

It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety so we need to walk, swim, run or whatever we like doing best. Those who create or those who do well on the worst scenario, give themselves worry and stress, tend to be devastated. If we cannot get some sunshine, we can always lighten up our rooms with brighter lights.

We can have lunch outside the office. Take frequent walks instead of driving our cars over short distances. No man is indispensable. First of all our circle of friends is always there to give us some moral support. Spending time and engaging ourselves in worthwhile activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support. Good friends are quite important and their company generally lightened up our spirits. To get to know and to find such friends we simply have to be friendly with ourselves, and then the friendships will naturally follow us. We need to understand the power of touch and support and we have not to underestimate its strength and support.

Don't we feel so good when someone pats us on our back and gives us some words of encouragement during your most challenging times and difficult times? Just hug or embrace someone someday you will see that you have almost changed his life. Get intimate with him and try to establish close ties with his family and friends. The love and care expressed by you will tremendously boost him and well as your immune system and fury of worry will be diminished for all.

In our lives storms may come and go. in the form of reversals, but if we have the power and foundation of inner fulfillment and if we deal with it with a very clear practical mind these storms will not kill us or will not disrupt us. There could be numberless reasons for which we keep on worrying. We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry if we generate within ourselves the power of enlightenment within ourselves. There's no sense in worrying about the negatives if these negatives cannot be changed. If we waste energy and happiness on the things we can't change, we'll only make ourselves more frustrated and come to the stage of depression dejection and disappointments.

Negativity is a habit.

Negativity is a habit and we often don't realize we're doing ourselves down. Under each negative thought that we have written, we can spot an alternative way of looking at it, that isn't so negative. Take your mind to positivity and mold and drive your thoughts to the positivity. There's a world of difference between expecting failure or rejection so as not to be disappointed when it occurs and recognizing it as a possibility of being positive. It's sensible to look at a situation from all angles and to have a back-up plan to fall back on if need be. People who do this will not see failure as another step on the road to eventual success; but by expecting and envisioning success, there's less likely to be a failure. Let us find some ways of removing negative thoughts and discouraging our worries to be born.

Let us all generate and create happiness within us

CHAPTER 3

POSITIVE THINKING IS OF STATE OF MIND

Positive thinking state of mind and positivity is something we cannot earn or buy. If we have spent your lives trying to get some happiness or something that will make us happy, odds are that we are wasting a really good life and that the negative is following us. We have overlooked a lot of personal happiness. We are probably spending so much time chasing and dreaming of unnecessary thing of what could be of no use to us we are wasting our valuable time and money and probably we are forgetting about all the small and big things occurring that could make us happy.

We need to remember that people and things alone, won't make us happy. Our own efforts not to get worried or depressed make us happy. Positive Thinking make us happy. We ought to remember the saying, that "Positive Thinking along can bring happiness and it is a state of mind". State of mind is what you think do and act in a peaceful manner without being getting worried or depressed.

The best thing about happiness and positive thinking is that you get it is free. You don't have to pay or you do not have to open any account to be happy. You don't have to pay monthly rent for getting it either. All you need is to think positively .You just have to change your perspective, your views on what you are seeing and feeling.

Positive thinking and happiness is not something which is quite readymade. It comes from your own actions deeds and your thoughts. Don't let one cloud darken the whole sky. Angriiness and happiness don't mix. You must dig out the angriness in you, and see that the happiness has shown and seeded a place to grow its roots by positive thinking alone.

The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy. Laugh when you can, apologize when you should, and let go of what you can't change. Think positive and just visualize that what is stored in destiny would not be negative. If you want to be happy, practice meditation. If you want, others to be happy practice compassion. Whoever is happy will make others happy, too. Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, you radiate happiness to the world.

Visualize your light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and your joy and you shall form an invincible host against difficulties. The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything.

Happiness fills your heart each day and your whole life through with clean thoughts. Any day would be a wonderful day if you do not take life so seriously. Happiness is not about being a winner -it's about being gentle with life being gentle within you. Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world.

When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing. First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Look at the birds of the air; they do not sow or reap or store away in barns, and yet our heavenly Father feeds them. Imagine that you're already a positive person and you love life.

The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts. Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity. "Positive Thinking is a state of mind only and not the thoughts of negatives" Being a positive thinker is not about ignoring reality in favor of aspirational thoughts. It is more about taking a proactive approach to your life. Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive

CHAPTER 4

NEGATIVITY TO POSITIVITY

We need to learn a lesson from every situation. No matter how difficult the situation may appear. We should recognize the beautiful lessons waiting to be discovered. Sometimes lessons may prove to be expensive and costly, but every problem is a learning experience in disguise. We need to be conscious of our thoughts, especially, when life just isn't going our way. The moment we see that we are diving into frustration, agony, sorrow or low self-esteem we must shift our thoughts, by thinking about something completely different and unrelated. This will strangle the pattern of self-pity, mind-created imaginations, and negative downward stairs.

Really what makes us different from other mammals is our ability to control our thoughts and think for ourselves positively and shift our negative thoughts to a positive angle. We may have made mistakes, but now we can accept it and continue, knowing that we will make a different decision in the future. If we understand this it can be appreciative for the experience. We cannot be both angry and grateful at the same time. We should start counting the blessings and miracles in our lives and if we start exploring for them and we would find more. We should console our mind as to what's not there to be grateful?. It's quite true that we are alive and breathing! We have to realize how lucky we are with all the positivity in abundance in our lives. Our mind and body becomes dumb and mum when it comes to pressure, all it wants to do is take the easiest way out and to throw out of us our negative within us. Feeling good about ourselves and showing self-confidence boosts our skills potential and capabilities in any areas of work and supports us to become more positive. We need to shift our thoughts from being a negative person to more strong a positive man.

Also keeping in mind that pushing things to the limit and going beyond what we think is possible for us to get to the next step of being positive. It becomes another key to achieving what we really want to do. Even if it may even be relationships and we are finding it difficult to meet someone where we are actually interested in, we need not wait because it usually doesn't come to us by own, we must stand up to get help from any learned fellow. One of the most important things while doing all of this is to be happy about what we are doing, thus we ought to have a successful goal setting our lifestyle with a positive attitude. At times we may suffer from chronic depression, though we know how good things look on to others life cannot be worse for us. Let's imagine how to deal when life leaves a great big steaming pile at our doorstep. Lest we need to remember that external factors can be dealt with by taking positive steps to repair or at least address the root of the problem as best as we can. Whatever may be the primary cause of the problem, that cause must be examined first?. We may or may not be able to solve the problem, per se, but at least knowing that we are taking positive steps can help us improve our outlook. It will not be easy, of course, for us and it may be like suffering a chronic disease thus we must balance ourselves as "being positive" with an understanding that the reality is, it's going to be an ongoing battle for our own survival.

CHAPTER 5

Positive thinking will generate happiness in you. Our actions positive thinking breed confidence and courage in us. If we want to conquer fear, anger and worry we should sit ideal and just think about it. Let our deep worrying do some advance thinking and planning. If we look into our own mind and heart, and we will find nothing wrong there, what is there to worry about and generate unhappiness in us?

Is there anything to be unhappy about?

Practically nothing what is there to be unhappy about? So why worry unnecessarily and make our present and future dark. Discard negative thought think positive and be happy. Positive thinking is the key to all problems and worries. Solve all your problems and get rid of all unnecessary worries by simply thinking in a positive manner. What is there to worry about? Think positive, be positive and have confidence in you. You will create great happiness within yourself. You need to admit that there are problems that you cannot change. But you can change the way of your thinking if you identify the main reason of the problem.

Positive thinking will generate happiness in you.

And if you acknowledge the facts, that you have been negative or inactive in finding a solution to the problem, probably this will make it easier for you to become positive thus creating a new lease of life within you.

You must try to make goals.

Making goals can give you a more positive outlook on life. People often tend to get bored with life and get the feeling that they are stuck to negative things which the result they often get the feeling of being depressed. Setting a direction for yourself and a goal would surely help you to move forward. If you expecting to succeed, and are not afraid of failure, you have the best chance of staying positive and can create a very positive life within you. When you, or any of your associates, are tempted to worry about a problem, write out the solution and a definite answer to it. This helps a positive feeling to generate within you. Another thing you need to understand is that there are several ways to cultivate a mental attitude that can bring you peace and happiness and can carnage a good life within you. More of it if you fill your mind with thoughts of peace, courage, health, and hope, your life will be easy to live.

You would get a happy feeling of life and mind if you let yourself to forget your own unhappiness, by trying to create a little happiness for others. You are best to yourself. The perfect way to conquer worry is the Prayer of God.

There are several ways to cultivate a mental attitude.

To keep yourself from worrying about criticism, do not even try to get mixed with your enemies, because if you do you will hurt yourself far more than we hurting them. Instead of worrying about ingratitude, let's expect it. Let's remember that the only way to find happiness is not to expect gratitude, but to give for the joy of giving. Let us build a happy life within us generate peace and a healthy atmosphere around us.

Let us build a happy life within us

This will help us to lead a peaceful happy and prosperous life and we would find ourselves to be happier than before. You should do things in the order of their importance. You need to clear your desk of all papers except those relating to the immediate problem at hand. When you face a problem, solve it then and there, if you have the facts to make a decision. Make a decision fast and do not linger on. Learn to organize, deputize, and supervise and straight away come to decision.

Simply postponing it would spoil your good thoughts and there is every likelihood your mind may get into negative activities and start thinking in negative manner. Therefore write down a list of things that make you excited, however big, small, likely or unlikely. Then work to make them occur more often. Look for moments of joy and savor them. Recognize your good happening every day.

Eat well do plenty of exercise and do not skip meals.

It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety so we need to walk, swim, run or whatever we like doing best. Those who create or those who do well on the worst scenario, give themselves worry and stress, tend to be devastated. If we cannot get some sunshine, we can always lighten up our rooms with brighter lights.

We can have lunch outside the office. Take frequent walks instead of driving our cars over short distances. No man is indispensable. First of all our circle of friends is always there to give us some moral support. Spending time and engaging ourselves in worthwhile activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support. Good friends are quite important and their company generally lightened up our spirits.

To get to know and to find such friends we simply have to be friendly with ourselves, and then the friendships will naturally follow us. We need to understand the power of touch and support and we have not to underestimate its strength and support.

Don't we feel so good when someone pats us on our back and gives us some words of encouragement during your most challenging times and difficult times? Just hug or embrace someone someday you will see that you have almost changed his life.

Get intimate with him and try to establish close ties with his family and friends. The love and care expressed by you will tremendously boost him and well as your immune system and fury of worry will be diminished for all. In our lives storms may come and go. in the form of reversals, but if we have the power and foundation of inner fulfillment and if we deal with it with a very clear practical mind these storms will not kill us or will not disrupt us.

There could be numberless reasons for which we keep on worrying. We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry if we generate within ourselves the power of enlightenment within ourselves. There's no sense in worrying about the negatives if these negatives cannot be changed. If we waste energy and happiness on the things we can't change, we'll only make ourselves more frustrated and come to the stage of depression dejection and disappointments.

Negativity is a habit.

Negativity is a habit and we often don't realize we're doing ourselves down. Under each negative thought that we have written, we can spot an alternative way of looking at it, that isn't so negative. Take your mind to positivity and mold and drive your thoughts to the positivity. There's a world of difference between expecting failure or rejection so as not to be disappointed when it occurs and recognizing it as a possibility of being positive.

It's sensible to look at a situation from all angles and to have a back-up plan to fall back on if need be. People who do this will not see failure as another step on the road to eventual success; but by expecting and envisioning success, there's less likely to be a failure. Let us find some ways of removing negative thoughts and discouraging our worries to be born.

Let us all generate and create happiness within us

Let us all generate and create happiness within us by removing all negative thoughts negative feeling and unwanted desires that make our mind greedy and spoil the charm of our sweet good and happy living.

CHAPTER 6

DISCARD NEGATIVE THINKING

You may also feel that life has become terrible for you to live and you are carrying no hope that someone would be there to rescue you. Happiness is your own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts. The ghosts of the past have to be exorcised. You may be working in any field, the key to success is your outlook. Sometimes you may think that no road is left for you from where you can achieve the happiness of life. There may be chances that someone who was there with you before might hold on to you when you are on the dark side of the life. The experience has taught us that we should buy some strength, hope and positive ness from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments and live with considerable optimism.

Happiness in life comes through the doors of positive thoughts; we do not even realize which one is left open. We have so many reasons to cry and at the same time plenty of reasons to smile as well. Keeping our dreams and hope alive might be a reason that success and happiness will come our way again. We ought to know that happiness alone does not stand for anything, but it is on our way of thinking that how do we keep ourselves happy in life. Ending up our lives does not lead us to our destination but of course proves we are supposed to be cowards who know not to unfold the doors of belief in God and in ourselves. Failure and disappointment are part of our life. The only thing is that we need to face and solve the problem. We must not forget to believe in God whatever our situation may be, we would be taken away from Him by the difficulties, in order that we bow down and surrender.

But if our faith is strong enough we will not be let down, rather we would break the knees of sorrows and force it to die and lead happy lives. We should not surrender but must find out ways to come out of our worries, anxieties and difficulties. We ought not to indulge ourselves into the darkness of the room but find out the doors to free ourselves from unnecessary fear and worries. We must belief in ourselves and our hearts, and believe in the ones who love us and not the ones whom we love. We must not fall on the negative side of a thing. It is the real time when you keep on revealing the truth of our lives and relations, do not fall on the reverse side but think how good it was that because of the hard times of our lives we could well judge about them.

We should always try to be positive and should think that whatever is happening, it is the positive side or consequence of that incident in would be on the positive side of our imagination. With all these thoughts, I would request my readers to implement some good thoughts in their life that would make things easier to be tackled by them. We should accept the situation and fight it with more determination. In this world nothing is good or bad and only thinking makes it so. We ought to know that advice from people around us will help us to overcome from the any drastic situation. Also we have to always minimize the stress as it gives nothing but takes away joy and happiness from our lives.

And finally we need to take things casually and fight with it seriously. The next morning after all, will surely come with fresh air to breathe the new hopes in us with the brightness of the sun. A clear minded person looks for good qualities in the other person, whereas a negative mind always looks for the fault in the other person, whereas a negative mind always looks for the fault. An optimist goes forward keeping in mind the past, a pessimist thinks of the future and reverts back to the past. In fact negative thoughts are our greatest enemies. Experience the happiness in all circumstances by maintaining better relationships. How about understanding that sadness cannot touch a person with a positive attitude?

The capability increases as It boosts up patience and confidence. It increases the decision of making power. Creative way of thoughts appears in the mind. Positive thoughts teach the art of finding solutions to any problem. Optimism is something what we do. Anxiety and other negative emotions are known to be detrimental to the body, especially to our immune systems, and having an optimistic nature seems to protect against those effects. People who are supposed to be optimistic, about their future, behaving differently. They do exercise, do not indulge in in smoking and often follow a good and better diet. Whenever we are unhappy, if we analyze the reason for our unhappiness, it is because life is not matching our expectations.

CHAPTER 7

HAVE POSITIVITY WITHIN US

You may feel largely uncomfortable, when worries attack your thoughts and mind which makes worrying about a situation an easier option to get depressed and diffused. While you are consuming more worries you are far too busy to do anything else to fix the real problem and would rather find it hard to get into a smart solution. Thus resulting in a fact that you spend your evenings worrying only without even bothering to find some time to search a new job.

You get nothing out of worrying except only to think and cry. Another cause of getting worried is the attachment with which your inner soul gets attracted to. Attachment brings worry. If you have a problem and you come up with the answer, you stop worrying immediately. Our minds can be dishonest, persuading us that we are worrying about something, when our deepest fear is entirely different. No-one likes to admit that they've chosen to worry.

The first step is to write down your worries, which will help you make sense of them, and then decide on one small step you can take towards a solution. But to be very true no man in this world is free of obstacles or difficulties. Don't make worry your habit. Break this habit and stop all the negative and panic thoughts provoking your mind all the time.

If you can't change the past, but you must not ruin the present by worrying about the future. Joy is what happens to us when we allow ourselves to recognize how good things really are. When we feel worried and depressed, we need to consciously form a smile on our faces and act upbeat until the happy feeling becomes genuine reality. Feelings of depression and hopelessness and or anger are even tougher to cope with on a consistent basis.

When you are worried, you not only hurt yourself, but the limited support systems that are still holding on your mind but making you to get more and more worried and nothing is achieved in terms of success except the re-carnation of worries and worries. Your actions breed confidence and courage. If you want to conquer fear, anger and worry do not sit ideal and just think about it.

Let our deep worrying become advance thinking and planning. If you look into your own mind and heart, and you find nothing wrong there, what is there to worry about? Practically nothing what is there to fear about and again nothing? So why worry unnecessarily and make your present and future dark.

Negative Thoughts Provoke Our Minds

Each day has its own worries and troubles. Always think positive. If there is not any solution to the some problem then do not waste time worrying about it. And if there is a solution to the problem then why waste time worrying about it. Act fast be positive generate positive thinking worries will automatically vanish in the air. But if you tend to worry they will never rob tomorrow of its sorrows, but will only deny today of its meaning happiness and joys. Negative thoughts only produce worries and worrying is actually a form of superstition and creates false images in our mind and that is the main reason and cause which makes and leads us to this point of imagination.

A human being can survive almost anything, as long as he or she sees the end in sight and starts analyzing his positive thoughts. We must not forgot that something bad or good is to happen it is sure to happen, whether we worry or not. Let us put our energy into today and stop worrying about the future and past. Positive Thinking will ward off everything and bring happiness in our lives. The basic facts we should know about worry. The more you worship, the less you worry.

Generate Positive Thinking

There is nothing that wastes the body like worry, and anyone who has any faith in God should need not to worry about anything whatsoever is to happen in future. Positive thinking is the creation of good imagination. We must first study and after carefully weighing all the facts than only come to a powerful decision. Simply making castles in the air won't solve our problems but add more to our woes. Anxiety and worry can go hand in hand. When anxiety grabs the mind, it is self-perpetuating.

Your mind gets clogged with numerous with buts and ifs. Do not worry about your life. Worries are repetitive thoughts associated with feelings of anxiety in anticipation of some negative future event. Yet anxious feelings and the worries that lead to them can prove helpful. It becomes a difficult problem if you are constantly anxious to know as to the happening of the future. It will become a hindrance to your everyday life, rather than motivate you to some good and better things. Worrying thoughts reproduce faster so one of the most powerful ways to stop the spiral of worry is simply to disclose the worry to a friend. What you eat or drink; or about your body, what you will wear will add to negativity may discard positive thinking.

Happiness comes with Positive Thinking.

If you know that the circumstance is beyond your control or power change than revise it to your liking. Just try to put a stop-less order on your worries. Don't permit little things which become insects of life to ruin your happiness. Co-operate with the inevitable. Decide just how much anxiety a thing may be worth and refuse to give in anymore. All the happiness is not given in one go it comes slowly and slowly with positive thinking.

Have worry under your control. If your worries center around, pay special attention to remain positive and be happy. Keep yourself happy, treat your worried thoughts as valuable signals. How to keep from worrying about criticism? Simply unjust criticism and think positively and do often discard a bad compliment. It often means that you have aroused jealousy and envy. Let's keep a record of the fool things we have done and stop criticizing ourselves.

Cause of Worry is Negative Thinking- Think Positive

The utmost cause of worry is our negative thinking as it leads us to the state of depression. Worries are there to motivate us and not a mere source of information-gathering and problems. Dejection and Depression is the inability to construct a future. Depression is inertia. That's the thing about depression: But depression is so insidious, and it compounds daily, that it's impossible to ever see the end. Depressed people think they know themselves, but maybe they only know depression. There are no hopelessness than this to get depressed. They never even attempt to think positive.

Times will change for the better-Think Positive

Our negative thinking and attitude towards suffering and depression becomes very important because it can affect how we cope with suffering when it arises. Depression is nourished by a lifetime of un-grieved and unforgiven causes. Never worry about your heart till it stops beating. How can you deal with anxiety? You might try what when you did. A person worried so much that he decided to hire someone to do his worrying for him. Times will change for the better when you change.

Worry is a misuse of the imagination. Worry is most often a prideful way of thinking that you have more control over life and its circumstances than you actually do. Positive Thinking leads your way to good and happiness. An art of Good and Happy Living. Neglect worries keep yourself happy, treat your worried thoughts as valuable signals. These are the fundamental facts you should be familiar about worries. A huge factor to stay happy is to cater your worries around, an important relationship in your life and pay special attention sustaining positive relationships.

Worries are there to motivate information gathering and problem-solving. Make your mind firm and do come to a positive decision as come what we will not allow the worries to entire our mind and soul. Once a decision is carefully reached we should get busy carrying out our decisions and should not bother about all the anxieties that are about to come. When we, or any of our colleagues or associates, are about to worry about a problem, we must write it out and think positively of the questions:

Instead of worrying about what people say of you, why not spend time trying to accomplish something they will admire. What if we just acted like everything was easy? How would your life be different if you stopped worrying about things we can't control and started focusing on the things we can? Let today be the day.

You free yourself from fruitless worry, seize the day and take effective action on things you can change. We would change ourselves for the betterment if we start thinking in positive terms. Positive thinking is what is required of us and simply worrying about the future things or as to what will happen in the next moment will certainly deprive us of good and happy living that we are about gather or get in the next hour.

CHAPTER 8

WHY DISAPPOINTMENT

Being a positive thinker is not about ignoring reality in favor of aspirational thoughts. It is more about taking a proactive approach to your life. Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive impact it will have on your mental, emotional, and physical health will be well-worth it. At times we may think that there is no road left for us from where we can achieve the happiness of our lives.

We may also feel that life has become terrible for us to live and we are carrying new hope that someone would come to rescue us. There may be chances that someone who was there with us before might have held on to us when we were on the dark side of life. What if when everything goes wrong and all the doors of happiness are closed our life becomes a silent one. It is quite common and we are aware of a marvelous proverb that Life itself is a stage and we all are the performers, performing different acts assigned to us by our almighty power. We should not forget as to what is in our possession?, if it is to fulfill our duties towards our responsibility and do whatever is correct and is allowed by us in our life?.

We should not forget that happiness in life comes through the doors of positive thoughts; we need to have them first. If one door happens to close, another opens, in the event only when we are confident and optimistic. We have so many reasons to cry and at the same time plenty of reasons to smile as well. Similarly, happiness does not stand for anything, but is on our way of thinking that how do we keep ourselves happy in life. Failure and disappointment are part of our life.

The only thing is that we need to face and solve the problem is by keeping our dreams and hope alive be it a reason that success and happiness will come our way again. There are quite a number of reasons to believe that for a successful and happy life the mystery surrounding it lies in our interests, and good memory which is the basis of our interest, power of desire and aim, keeping ourselves smiling and the doubt free character which is the foremost important reason for a successful and happy life. If we possess one solid unselfish and doubt free character within ourselves we would be quite happy and successful.

The experience has taught us that we should buy some strength, hope and positivity from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments we can live with considerable optimism.

Now let's us imagine that we are not feeling at our best today, and we are having thoughts that could be classified as negative. We shouldn't be thinking such negative thoughts. We don't like the negative thoughts. We ought to know that negative thoughts are stressful, demoralizing and depressing. We shouldn't aim to have negative thoughts at all. Often we feel uncomfortable because we think we have to say or do something in response to another person's words.

When we find ourselves thinking this way, it helps enormously to take a few moments to check inside and notice what we are feeling. We are deeply depressed that negativity has governed us and has taken a deep root in our minds.....So, let's imagine that you have chosen to focus on your negative thinking with regards to school. The next step is to spend a little bit of time each day evaluating your own thoughts. When you find yourself thinking critical thoughts about yourself, take a moment to pause and reflect.

While you might be upset about getting a bad grade on an exam, is berating yourself really the best approach? Is there any way to put a positive spin on the situation? While you might not have done well on this exam, at least you have a better indication of how to structure your study time for the next big test. However, despite of all these good thoughts which are embodied to us by the almighty fail to revive these unwanted circumstances that lead us to sorrow and difficulties and a situation where we do not know what is correct and good for us and what is wrong for us.

We should always remember that, "Life is there, where there is hope". That single thing that remains in our hands is to find out ways to know how to overcome these worries of our life at that very moment when all doors are closed for us which means that whatever situation is there, we must not give up hope. We must fight because there have been always a chance that with good faith and hard work we can turn the odds in our favor. It is often said that it is very easy to advice but when it comes to us, things go out of our control and we fail to suggest a way out for ourselves.

We fall into the trap of unnecessary worries and elope ourselves with negative thoughts. We feel better when somebody else is facing some difficulty but when it comes to us we fail to gather that faith, will power and the words of strength. Being a positive thinker is not about ignoring reality in favor of aspirational thoughts. It is more about taking a proactive approach to your life.

Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive impact it will have on your mental, emotional, and physical health will be well-worth it. It takes practice; lots of practice.

This is not a step-by-step process that you can complete and be done with. Instead, it involves a lifelong commitment to looking inside yourself and being willing to challenge negative thoughts and make positive changes. It is a common fact that no one in this world is free of obstacles or difficulties. If all the openings of happiness are shut for us and we have to overcome that and have no way to come out, but to survive lest we must have to learn to swim out of the sorrows because this is what is called life and sorrow free living.

There are lot more examples and in many other situations, where we will find that how we could have faced and fought with our sorrows and difficulties of life when there was no hope left in our lives. When the power of will is at the worst and each one of us knows that the one who is gone never comes back. Neither a thousands of words would not be enough to bring him back nor a million tears, because each and every moment, eyes would only shed tears , mind would remain tensed and we would be simply surrounded by worries and the life seems to have been vanished.

Life is ever expanding, contraction is death. As commonly said by big saints that the self-seeking man who is looking after his personal comforts and leading a lazy life for himself there would be no room for him even in the hell and he simply have lost the power of his will. One cannot do anything without it. We fail only when we do not try very hard to achieve the power and faith within us.

As soon as we lose faith, death comes in our way and we are surrounded by all the evils and stupid worries of the world. The secret and history of every successful man is to have, good confidence, faith and strength behind him and that remain the right cause of his single success in life. Unselfishness plays a very vital role in his life. He may not have been perfectly unselfish, yet he was tending towards it. If he had been perfectly unselfish, he would have been as great a success. The degree of unselfishness marks the degree of success everywhere and he leads to be successful man without fear worries and selfishness. Therefore creation of positivity in life is utmost necessary to enjoy the special gift of God to us.

The love for God and worshipping God adds to one common thing the immense faith in Him. There may be different beliefs and ways to worship God in different communities, places and religions, but one thing remains the same and that is the Love of God for all of us. Our world is full of odds and evens, happiness and sorrows, fulfilment and emptiness. And these are all created by the Almighty. However, the most beautiful Gift of God, is Human, which is such a mystery driven by Him which could hardly be defined or explained in depth.

We know that life cannot be foreseen. Life is not a bed of roses. Life is a battle field and not a bed of roses as every man on earth has to struggle very hard in making his life happy. If aim of our life is to stay happy and let others to be happy, we will be happy and remembered by all. But no one will actually remember us for the wealth we have gained, or success we have achieved. I have no aim in life. Summary living with no purpose in life is just like a feather moving towards the wind.

Life is such a special gift of Almighty and it is not gifted by Him to use it the way we like or love to. The actual path shown by Him needs to be followed by us for us to reach the peak of betterment every moment. We need to have some positive attitude to look at it comfortably but at the same time having a positive mental attitude does not mean banishing all negative thoughts and people from your life. One and another one arises.

CHAPTER 9

WHY NEGATIVE THOUGHTS

Simply unjust criticism and think positively and do often discard a bad compliment. It often means that you have aroused jealousy and envy. Let's keep a record of the fool things we have done and stop criticizing ourselves.

Cause of Worry is Negative Thinking- Think Positive

The utmost cause of worry is our negative thinking as it leads us to the state of depression. Worries are there to motivate us and not a mere source of information-gathering and problems. Dejection and Depression is the inability to construct a future. Depression is inertia. That's the thing about depression: But depression is so insidious, and it compounds daily, that it's impossible to ever see the end. Depressed people think they know themselves, but maybe they only know depression. There are no hopeless than this to get depressed. They never even attempt to think positive.

Times will change for the better-Think Positive

Our negative thinking and attitude towards suffering and depression becomes very important because it can affect how we cope with suffering when it arises. Depression is nourished by a lifetime of un-grieved and unforgiven causes. Never worry about your heart till it stops beating. How can you deal with anxiety? You might try what when you did.

A person worried so much that he decided to hire someone to do his worrying for him. Times will change for the better when you change. Worry is a misuse of the imagination. Worry is most often a prideful way of thinking that you have more control over life and its circumstances than you actually do. Positive Thinking leads your way to good and happiness.

An art of Good and Happy Living. Neglect worries keep yourself happy, treat your worried thoughts as valuable signals. These are the fundamental facts you should be familiar about worries. A huge factor to stay happy is to cater your worries around, an important relationship in your life and pay special attention sustaining positive relationships. Worries are there to motivate information gathering and problem-solving. Make your mind firm and do come to a positive decision as come what we will not allow the worries to entire our mind and soul.

Once a decision is carefully reached we should get busy carrying out our decisions and should not bother about all the anxieties that are about to come. When we, or any of our colleagues or associates, are about to worry about a problem, we must write it out and think positively of the questions: Instead of worrying about what people say of you, why not spend time trying to accomplish something they will admire. What if we just acted like everything was easy?

How would your life be different if you stopped worrying about things we can't control and started focusing on the things we can? Let today be the day. You free yourself from fruitless worry, seize the day and take effective action on things you can change. We would change ourselves for the betterment if we start thinking in positive terms. Positive thinking is what is required of us and simply worrying about the future things or as to what will happen in the next moment will certainly deprive us of good and happy living that we are about gather or get in the next hour.

CHAPTER 10

We need to know that positive thinking takes the focus away from what we don't have, to appreciating and making good use of what we have. It is closely connected to our emotional wellbeing and happiness. We feel loved and at peace with ourselves for a major part of our lives when we make this attitude ours. This adds and helps us to get rid of greed, amenity, bitterness, jealousy, and promotes a healthy and nurturing attitude towards others, which in turn gets reciprocated and we feel the sense of healthy living. This attitude impels you to utilize all that you are endowed with as a person, to achieve the highest possible goals. When we have this attitude, we are able to work without any external pressure to perform but there is sufficient pressure and motivation from within.

Positive thinking and a positive attitude of happy life is a joy for ever

The possessing of happy living is like any other habit, so we need to follow the routine of habit formation here as well. You will win new friends and admirers without having to impress them or conform to the pressure of doing things their way. You will be bubbling with life. You will be rearing to go and accomplish all you can with your new found confidence. The best part of adopting the 'positive thinking and a positive attitude of gratitude is that, you will be able to enjoy the smallest pleasures of nature with a heightened sense of satisfaction and awe. We can see and watch a beautiful flower and carry that joy in our mind for future enjoyment with a clear positive habit. We can go back to work freshen and can use it as an object to meditate on when we feel stressed.

When we have this attitude, we are able to work without any external pressure to perform but there is sufficient pressure and motivation from within. The habit of happy living is like any other habit, so we need to follow the routine of habit formation here as well. Happiness is our own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts. The ghosts of the past have to be exorcised. We may be working in any field, the key to success is our outlook.

Sometimes we may think that no road is left for us from where you can achieve the happiness of life. There may be chances that someone who was there with us before might hold on to us when we are on the dark side of the life.

Positive thinking and happy living is state of mind.

Positive thinking and happy living is state of mind and happiness is something we cannot earn or buy. We need to remember that people and things alone, won't make us happy. Our own efforts not to get worried or depressed make us happy. Positive living make us happy. We ought to remember the saying, that "Positive living along can bring happiness as it is a state of mind".

The ultimate goal of life should be to get happiness.

The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy. Laugh when we can, apologize when we should, and let go of what we can't change. Let us think positive and just visualize that what is stored in destiny would not be negative. If we want to be happy, practice meditation. If we want, others to be happy practice compassion. Whoever is happy will make others happy, too. Thus we can lead our path to happy sweet and good living.

Our greatest gift to others is to be happy.

Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, we radiate happiness to the world. We need to visualize our light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and your joy and you shall form an invincible host against difficulties.

The positive persons often dance to the happy tunes.

The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything. Happiness fills your heart each day and your whole life through with clean thoughts. Any day would be a wonderful day if you do not to take life so seriously. Happiness is not about being a winner it is about being gentle with life being gentle within you. Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world.

Happiness is not about being a winner it is about being gentle

When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing. First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Happiness is not about being a winner it is about being gentle. The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts.

Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity. Positive and happy living is not state of mind only it is the discernment of the negatives thoughts .Be a positive thinker and ignore reality in favor of aspirational thoughts. It is more about taking a proactive approach to life. Instead of feeling hopeless or overwhelmed, positive thinking and happy living allows to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive person will surely win and lead a sweet happy and good life.

Happiness in life comes through the doors of positive thoughts;

We do not even realize which one is left open. We have so many reasons to cry and at the same time plenty of reasons to smile as well. Keeping our dreams and hope alive might be a reason that success and happiness will come our way again. We ought to know that happiness alone does not stand for anything, but it is on our way of thinking that how do we keep ourselves happy in life. Ending up our lives does not lead us to our destination but of course proves we are supposed to be cowards who know not to unfold the doors of belief in God and in ourselves.

Failure and disappointment are part of our life.

Failure and disappointment are part of our life. The only thing is that we need to face them boldly and courageously and try our best to solve the problem. We must not forget to believe in God whatever our situation may be we need to make our faith strong enough not be let down, rather we would break the knees of sorrows and force it to die and lead happy lives. We should not surrender but must find out ways to come out of our worries, anxieties and difficulties. We ought not to indulge ourselves into the darkness of the room but find out the doors to free ourselves from unnecessary fear and worries. We must belief in ourselves and our hearts, and believe in the ones who love us and not the ones whom we love. We must not fall on the negative side of a thing.

The experience has taught us that we should buy some strength, hope and positive ness from our loved ones to help ourselves in such a situation rather than surrendering our lives to God as it is a precious gift of God which is equipped with full of joy and happiness we need to help ourselves in these critical moments and live with considerable optimism. Happy living is sure to make our life good and sweet. It is the real time when you keep on revealing the truth of our lives and relations, do not fall on the reverse side but think how good it was that because of the hard times of our lives we could well judge about them.

We should always try to be positive and happy

We should always try to be positive and should think that whatever is happening, it is the positive side or consequence of that incident in would be on the positive side of our imagination.

With all these thoughts, I would request my readers to implement some good thoughts in their life that would make things easier to be tackled by them. We should accept the situation and fight it with more determination.

In this world nothing is good or bad and only thinking makes it so.

We ought to know that advice from people around us will help us to overcome from the any drastic situation. Also we have to always minimize the stress as it gives nothing but takes away joy and happiness from our lives. And finally we need to take things casually and fight with it seriously. A clear minded person looks for good qualities in the other person, whereas a negative mind always looks for the fault in the other person and also a negative mind always looks for the fault. An optimist goes forward keeping in mind the past, a pessimist thinks of the future and reverts back to the past. In fact negative thoughts are our greatest enemies.

Experience the happiness in all circumstances by maintaining better relationships.

Sadness cannot touch a person with a positive attitude. It increases the decision of making power. Creative way of thoughts appears in the mind. Positive thoughts of happy living teach us the art of finding solutions to any problem. Optimism is something what we do. Anxiety and other negative emotions are known to be detrimental to the body, especially to our immune systems, and having an optimistic nature seems to protect against those effects. People who are supposed to be optimistic, about their future, are sure to lead a sweet good and happy life. Their secret of happiness is that they do exercise, do not indulge in in smoking and often follow a good and better diet. Whenever we are unhappy, if we analyze the reason for our unhappiness, it is because life is not matching our expectations.

CHAPTER 11

NEGATIVE THINKING CAN RUIN YOUR LIFE

Remember three aspects - naturalness, simplicity and belongingness. Just open up your heart and be natural. Next is living a simple life. Living with the confidence will get whatever is needed, that is simplicity. Right or wrong, we are what we are. We need to tone our life accordingly and if we live like this naturally, then there will not be any fear. There will be no doubts or blocks in life. This is the important mantra of Art of Sweet Living. Another important thing is that if we cannot get some good sunshine, we can always lighten up our thoughts with brighter lights of happy living. We can have ample of lunch of positive thinking. To avoid negative thoughts we need to take frequent walks. No man is indispensable and no man is not capable of positive thinking. Let us make ourselves happy and life become a sweet living.

Happiness is a state of mind.

We know the saying, that “Happiness is a state of mind”. And state of mind is what we think and what we do or act in a peaceful manner without being getting worried or depressed. If you are interested in getting more happiness, to get it through positive thinking. All we need to do is to focus on all the directions on positive thinking and happy living as if we have already attained success. We need to focus on the thing and create a life within us.

If we want love and affection, entertain people and give them the abundance of love. If we want to have greater health, pay attention on all the ways that make us healthy, thus creating and delivering a good life within us by thinking in positive ways. We need to understand and admit that there are problems that we cannot change. But we can change the ways of our thinking and if we identify the main reason of the problem we can remove all the obstacles coming in our way of leading a sweet and happy life. And if we acknowledge the fact, that we have been negative or inactive in finding a solution to the problem, this will make it easier for us to become positive thus creating a new lease of life within us.

Positive thinking will surely make us happy.

Another thing to understand is that we must try to make our goals. Making goals can give us a more positive outlook on life. People often tend to get bored with life and get the feeling that they are stuck to negative things with the result they often get the feeling of being depressed dejected and monotonous and become unhappy in life.

Setting a direction and a goal for ourselves, would surely help us to move forward. If we are expecting to succeed, and are not afraid of failure, we stand the best chance of staying positive and thus can create a very positive life within us.

Mental attitude that can bring you peace and happiness.

Another thing you need to understand is that there are several ways to cultivate a mental attitude that can bring you peace and happiness and can carnage a good life within you. More of it if you fill your mind with thoughts of peace, courage, health, and hope, your life will be easy to live. If you think in positive terms you would get a happy feeling of life and mind you if you let yourself to forget your own unhappiness, by trying to create a little happiness for others you are sure to get happiness in your live. You are best to yourself. The perfect way to conquer worry is the Prayer of God. You should do things in the order of their importance.

Learn to think in positive terms.

When you face a problem, solve it then and there, by thinking positively and if you have the facts of making a decision, make a decision fast and do not linger on. Learn to think in positive terms organize the things, deputise, and supervise straight away by coming to decision. To keep yourself from worrying about criticism, do not even try to get mixed with your enemies, because if you do you will hurt yourself far more than we hurting them. You will fall prey to negative thinking and this in turn will lead you unhappiness in life. Simply postponing it would spoil your good thoughts and there is every likelihood your mind may get into negative activities and start thinking in negative manner. Therefore think positive, write down a list of things that make you positive, however big, small, likely or unlikely. Then work to make them occur more often. Look for moments of joy and savor them. Recognise your good happening every day. Be positive think positive and be happy.

Happiness is your own choice and decision

You may also feel that life has become terrible for you to live and you are carrying no hope that someone would be there to rescue you. Happiness is your own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts. Our friends are always there to give us some moral support. Spending time and engaging ourselves in worthwhile positive activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support and talking in terms of positive thinking. Good friends are quite important and their company generally lightened up our spirits. This makes us to think in positive manner and to get to know such friends we simply have to be friendly with ourselves, and then the friendships will naturally follow us and make our lives happy.

Only way to find happiness is not to expect gratitude.

Let us remember that the only way to find happiness is not to expect gratitude, but to give for the joy of giving. Let us build a happy life within us generate peace and a healthy atmosphere around us. This will help us to lead a peaceful happy and prosperous life and we would find ourselves to be happier than before. We need to understand the power of positive thinking and its support and we have not to underestimate it strength and support.

Don't we feel so good when someone pats us on our back and gives us some words of encouragement during your most challenging times and difficult times and advises us to remain positive and think positive just hug or embrace someone with positive attitude someday we will see that we have almost changed our life. The ghosts of the past have to be exorcised. We may be working in any field, the key to success is our outlook.

Sometimes we may think that no road is left for us from where we can achieve the happiness of life. One need not to forget that we need to eat well do plenty of exercise and do not skip meals It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety, so we need to walk, swim, run or whatever we like doing best above all we must move ahead in direction where our mind can generate electricity to think in positive directly and bring immense happiness to us

Difficulties and storms may come and go.

In our lives difficulties and storms may come and go in the form of reversals, but if we have the power of positive thinking and foundation of inner fulfillment we would be able to deal with it with a very clear practical mind and with this positive thinking these storms will not kill us nor will disrupt us. There could be numberless reasons for which we keep on worrying. We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry If we generate within ourselves the power of positive thinking within ourselves and try to be happy all the time.

The best thing about happiness is that we get it is free.

We don't have to pay or we do not have to open any account to be happy. We don't have to pay monthly rent for it either. We just have to change our perspective, our views on what we are seeing and feeling. Happiness is not something which is quite readymade. It comes from our own actions and deeds.

Angriness and happiness don't mix.

We must dig out the angriness in us, and see that the happiness has shown and seeded a place to grow its roots. The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy.

If you want to be happy, be positive first practice meditation.

Laugh when you can, apologize when you should, and let go of what you can't change. Think positive and just visualize that what is stored in destiny would not be negative.

If you want to be happy, be positive first practice meditation. If you want, others to be happy practice compassion. Whoever is happy will make others happy, too.

Happiness doesn't depend on any superficial conditions.

Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, we radiate happiness to the world. We need to visualise our light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and you shall form an invincible host against difficulties.

The path to happiness is forgiveness.

The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything. Happiness fills our heart each day and our whole life through with clean thoughts. Any day would be a wonderful day if we do not take life so seriously. Happiness is not about being a winner it is about being gentle with life being gentle within us.

Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world. When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing. First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Imagine that you are already a positive person and you love life.

The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts. Absence of positive thinking, has eluded us of our great happiness and left us far behind. This very little known fact has kept many of us from reaching our goal of happiness. Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity.

Happiness can only be achieved if you have a positive mind.

Happiness is a state of mind only and not the thoughts of negatives, and it quite true that happiness can only be achieved if you have a positive mind and a clear attitude of being a positive person. Happiness and positivity go hand in hand. If you are positive you are a happy person and if you possess negativity you would land yourself to be a very negative person thus ruining your life for what of nothing with the result you become an unhappy person and you remain aloof from leading a sweet good and happy living.

CHAPTER 12

ALWAYS THINK POSITIVE AND FORGET NEGATIVITY

Being a positive thinker is not about ignoring reality in favor of aspirational thoughts. It is more about taking a proactive approach to your life. Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive impact it will have on your mental, emotional, and physical health will be well-worth it.

At times we may think that there is no road left for us from where we can achieve the happiness of our lives. We may also feel that life has become terrible for us to live and we are carrying new hope that someone would come to rescue us. There may be chances that someone who was there with us before might have held on to us when we were on the dark side of the life.

What if when everything goes wrong and all the doors of happiness are closed our life becomes a silent. It is a quite common and we are aware of a marvelous proverb that Life itself is a stage and we all are the performers, performing different acts assigned to us by our almighty power. We should not forget as to what is in our possession?, if it is to fulfill our duties towards our responsibility and do whatever is correct and is allowed by us in our life?.

We should not forget that happiness in life comes through the doors of positive thoughts; we need to have them first. If one door happens to close, another opens, in the event only when we are confident and optimistic.

We have so many reasons to cry and at the same time plenty of reasons to smile as well. Similarly, happiness does not stand for anything, but is on our way of thinking that how do we keep ourselves happy in life. Failure and disappointment are part of our life. The only thing is that we need to face and solve the problem is by keeping our dreams and hope alive be it a reason that success and happiness will come our way again.

There are quite a number of reasons to believe that for a successful and happy life the mystery surrounding it lies in our interests, and good memory which is the basis of our interest, power of desire and aim, keeping ourselves smiling and the doubt free character which is the foremost important reason for a successful and happy life. If we possess one solid unselfish and doubt free character within ourselves we would be quite happy and successful.

The experience has taught us that we should buy some strength, hope and positivity from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments we can live with considerable optimism.

Now let's us imagine that we are not feeling at our best today, and we are having thoughts that could be classified as negative. We shouldn't be thinking such negative thoughts. We don't like the negative thoughts. We ought to know that negative thoughts are stressful, demoralizing and depressing.

We shouldn't aim to have negative thoughts at all. Often we feel uncomfortable because we think we have to say or do something in response to another person's words. When we find ourselves thinking this way, it helps enormously to take a few moments to check inside and notice what we are feeling. We are deeply depressed that negativity has governed us and has taken a deep root in our minds.

So, let's imagine that you have chosen to focus on your negative thinking with regards to school. The next step is to spend a little bit of time each day evaluating your own thoughts. When you find yourself thinking critical thoughts about yourself, take a moment to pause and reflect. While you might be upset about getting a bad grade on an exam, is berating yourself really the best approach? Is there any way to put a positive spin on the situation?

While you might not have done well on this exam, at least you have a better indication of how to structure your study time for the next big test. However, despite of all these good thoughts which are embodied to us by the almighty fail to revive these unwanted circumstances that lead us to sorrow and difficulties and a situation where we do not know what is correct and good for us and what is wrong for us.

We should always remember that, "Life is there, where there is hope". That single thing that remains in our hands is to find out ways to know how to overcome these worries of our life at that very moment when all doors are closed for us which means that whatever situation is there, we must not give up hope. We must fight because there have been always a chance that with good faith and hard work we can turn the odds in our favor.

It is often said that it is very easy to advice but when it comes to us, things go out of our control and we fail to suggest a way out for ourselves. We fall into the trap of unnecessary worries and elope ourselves with negative thoughts. We feel better when somebody else is facing some difficulty but when it comes to us we fail to gather that faith, will power and the words of strength. Being a positive thinker is not about ignoring reality in favor of aspirational thoughts.

It is more about taking a proactive approach to your life. Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive impact it will have on your mental, emotional, and physical health will be well-worth it. It takes practice; lots of practice. This is not a step-by-step process that you can complete and be done with. Instead, it involves a lifelong commitment to looking inside yourself and being willing to challenge negative thoughts and make positive changes. It is a common fact that no one in this world is free of obstacles or difficulties. If all the openings of happiness are shut for us and we have to overcome that and have no way to come out, but to survive lest we must have to learn to swim out of the sorrows because this is what is called life and sorrow free living.

There are lot more examples and in many other situations, where we will find that how we could have faced and fought with our sorrows and difficulties of life when there was no hope left in our lives. When the power of will is at the worst and each one of us knows that the one who is gone never comes back.

Neither a thousands of words would not be enough to bring him back nor a million tears, because each and every moment, eyes would only shed tears , mind would remain tensed and we would be simply surrounded by worries and the life seems to have been vanished. Life is ever expanding, contraction is death. As commonly said by big saints that the self- seeking man who is looking after his personal comforts and leading a lazy life for himself there would be no room for him even in the hell and he simply have lost the power of his will. One cannot do anything without it.

We fail only when we do not try very hard to achieve the power and faith within us. As soon as we lose faith, death comes in our way and we are surrounds by all the evils and stupid worries of the world. The secret and history of every successful man is to have, good confidence, faith and strength behind him and that remain the right cause of his single success in life. Unselfishness plays a very vital role in his life. He may not have been perfectly unselfish, yet he was tending towards it. If he had been perfectly unselfish, he would have been as great a success. The degree of unselfishness marks the degree of success everywhere and he leads to be successful man without fear worries and selfishness.

Therefore creation of positivity in life is utmost necessary to enjoy the special gift of God to us. The love for God and worshipping God adds to one common thing the immense faith in Him. There may be different beliefs and ways to worship God in different communities, places and religions, but one thing remains the same and that is the Love of God for all of us. Our world is full of odds and evens, happiness and sorrows, fulfilment and emptiness. And these are all created by the Almighty. However, the most beautiful Gift of God, is Human, which is such a mystery driven by Him which could hardly be defined or explained in depth.

We know that life cannot be foreseen. Life is not a bed of roses. Life is a battle field and not a bed of roses as every man on earth has to struggle very hard in making his life happy. If aim of our life is to stay happy and let others to be happy, we will be happy and remembered by all. But no one will actually remember us for the wealth we have gained, or success we have achieved. I have no aim in life.

Summary living with no purpose in life is just like a feather moving towards the wind. Life is such a special gift of Almighty and it is not gifted by Him to use it the way we like or love to. The actual path shown by Him needs to be followed by us for us to reach the peak of betterment every moment. We need to have some positive attitude to look at it comfortably but at the same time having a positive mental attitude does not mean banishing all negative thoughts and people from your life. One and another one arises.

Change your attitude from negative thinking to Positive Thinking and converge yourself from negativity to positivity. Positive thinking is a mental and emotional attitude that focuses on the bright side of life and expects positive results. A positive person anticipates happiness, health and success, and believes he or she can overcome any obstacle and difficulty. Positive thinking is not accepted by everyone. Some, consider it as nonsense, and scoff at people who follow it, but there is a growing number of people, who accept positive thinking as a fact, and believe in its effectiveness. We need to learn a lesson from every situation. No matter how difficult the situation may appear.

We should recognize the beautiful lessons waiting to be discovered. Sometimes lessons may prove to be expensive and costly, but every problem is a learning experience in disguise. We need to be conscious of our thoughts, especially, when life just isn't going our way. The moment we see that we are diving into frustration, agony, sorrow or low self-esteem we must shift our thoughts, by thinking about something completely different and unrelated.

Negative thinking is contagious.

We affect, and are affected by the people we meet, in one way or another. This happens instinctively and on a subconscious level, through words, thoughts and feelings, and through body language. Is it any wonder that we want to be around positive people, and prefer to avoid negative ones? People are more disposed to help us, if we are positive, and they dislike and avoid anyone broadcasting negativity. Negative thoughts, words and attitude, create negative and unhappy feelings, moods and behavior.

When the mind is negative, poisons are released into the blood, which cause more unhappiness and negativity. This is the way to failure, frustration and disappointment. Individuals with a pessimistic explanatory style often blame themselves when bad things happen, but fail to give themselves adequate credit for successful outcomes.

They also have a tendency to view negative events as expected and lasting. As you can imagine, blaming yourself for events outside of your control or viewing these unfortunate events as a persistent part of your life can have a detrimental impact on your state of mind. Positive thinkers are more apt to use an optimistic explanatory style, but the way in which people attribute events can also vary depending upon the exact situation. This will strangle the pattern of self-pity, mind-created imaginations, and negative downward stairs.

Really what makes us different from other mammals is our ability to control our thoughts and think for ourselves positively and shift our negative thoughts to a positive angle. We may have made mistakes, but now we can accept it and continue, knowing that we will make a different decision in the future. If we understand this it can be appreciative for the experience. We cannot be both angry and grateful at the same time. We should start counting the blessings and miracles in our lives and if we start exploring for them and we would find more.

It's quite true that we are alive and breathing! We have to realize how lucky we are with all the positivity in abundance in our lives. Our mind and body becomes dumb and mum when it comes to pressure, all it wants to do is take the easiest way out and to throw out of us our negative within us. While the terms positive thinking and positive psychology are sometimes used interchangeably, it is important to understand that they are not the same thing. First, positive thinking is about looking at things from a positive point of view. Positive psychology certainly tends to focus on optimism, but it also notes that while there are many benefits to thinking positively, there are actually times when more realistic thinking is more advantageous. Feeling good about ourselves and showing self-confidence boosts our skills potential and capabilities in any areas of work and supports us to become more positive. We need to shift our thoughts from being a negative person to more strong a positive man.

Also keeping in mind that pushing things to the limit and going beyond what we think is possible for us to get to the next step of being positive. It becomes another key to achieving what we really want to do. You have probably had someone tell you to "look on the bright side" or to "see the cup as half full." Chances are good that the people who make these comments are positive thinkers. Even if it may even be relationships and we are finding it difficult to meet someone where we are actually interested in, we need not wait because it usually doesn't come to us by own, we must stand up to get help from any learned fellow. One of the most important things while doing all of this is to be happy about what we are doing, thus we ought to have a successful goal setting our lifestyle with a positive attitude. At times we may suffer from chronic depression, though we know how good things look on to others life cannot be worse for us. Let's imagine how to deal when life leaves a great big steaming pile at our doorstep.

Lest we need to remember that external factors can be dealt with by taking positive steps to repair or at least address the root of the problem as best as we can. Whatever may be the primary cause of the problem, that cause must be examined first? We may or may not be able to solve the problem, per se, but at least knowing that we are taking positive steps can help us improve our outlook. It will not be easy, of course, for us and it may be like suffering a chronic disease thus we must balance ourselves as "being positive" with an understanding that the reality is, it's going to be an ongoing battle for our own survival.

Depression will undermine even the strongest of wills, need help to maintain or at least be reminded of a positive outlook. Counseling, psychotherapy, and the right combination of medication will play a crucial role in helping to keep us from sinking into that very dark place that is the essence of depression. Be patient, but don't look for miracles.

It may be that we will need the help of professionals throughout our lives to maintain a generally even keel. If one could "will away" depression, there would be no need of doctors or drugs. What we can do is understand why we feel like we do, and explain to our counselors that we wish it were that easy, and that we appreciate our concern towards positivity. Shifting our thoughts enables us to the right path of our positivity and thinking in its direction of positivity can make us to lead a very happy life.

FORGET NEGATIVE THINKING

Never let life's hardships disturb you .no one can avoid problems, not even saints or sages. As with any habit, the habit of remaining positive in all situations takes practice and a commitment to yourself to take control. If you tend to think positive you stand to gain all the amenities of a happy life. Positive Thinking leads you to a happy life one must not forgot the life is what you make it, so make it a happy one!. Don't worry on things that may not happen, life is too short to worry too much. Smile and be happy. Make yourself to be positive person.

Don't hold onto anything that bothers your mind. It can only hurt your health and it won't help your problems at all. The people that live the longest in this world do not hold grudges or hold or fall prey into negative feelings. Visualize your worries on a large chalkboard in your mind. Watch yourself take a big eraser and erase the problems.

Every time the thoughts come back into your head, see yourself with the eraser again. Keep your slate clean and form a habit of thinking positive. We must not worry about tomorrow, for tomorrow will worry about itself. Each day has enough trouble of its own. Do not anticipate trouble, or worry about what may never happen. Keep in the sunlight. Imagine every day to be a positive day and the last of a life surrounded with hopes, The hours that come unexpectedly will be much the more grateful. The mind that is anxious about future events is miserable. Present fears are less than horrible imaginings. Positive thinking is sure to ward off every odd imagination and sure to make you a happy person.

Positive thinking actually means approaching life's challenges with a positive outlook. It does not necessarily mean avoiding or ignoring the bad things; instead, it involves making the most of potentially bad situations, trying to see the best in other people, and viewing yourself and your abilities in a positive light.

Positive thinking centers on such things as a belief in your abilities, a positive approach to challenges, and trying to make the most of bad situations. Bad things will happen. Sometimes you will be disappointed or hurt by the actions of others. This does not mean that the world is out to get you or that all people will let you down. Instead, positive thinkers will look at the situation realistically, search for ways that they can improve the situation, and try to learn from their experiences.

Positive attitude bring good cheer, remembering that the misfortunes hardest to bear are those that never happen, focus on the positive aspects of lives, rather than on the negative setbacks. Let us not waste our lives in doubts and fears. It is not work that kills us, it is worry and the negative thinking. Work is healthy; but worry is rust upon the blade. It is not movement that destroys the machinery, but friction. We need to forget the most disturbing negative thinking in our lives and opt for the positive attitude by following the principles of positive thinking. Not only can positive thinking impact your ability to cope with stress and your immunity, it also has an impact on your overall well-being.

CHAPTER 13

ANALYZING POSITIVITY

Thought which are provoking our mind, about the uncertainties and the negativities, as to what will happen tomorrow. Worries that are prevailing in our minds are repetitive thoughts associated with feelings of anxiety in anticipation of some negative future event. Whether the worries are about financial crisis, family problems, work, health or any topic of concern, the anxious feelings produced and sustained by the imaginary thoughts which always distinctly appear to be unpleasant. Worrying will carry tomorrow's load with today's strength.

Worry will not empty tomorrow of its sorrows, it empties today of its power and strength. Worries make you to move into tomorrow ahead of time. Half the worry in the world is caused by people trying to make decisions before they have sufficient knowledge on which to base a decision. Why worry about the future. Just imagine as to what if we just acted like everything was easy and there was nothing very serious about it to come in future.

Worry often gives a small thing a big shadow and its surrounding do frightened with more scary things. Why worry about tomorrow; concentrate on today happening as for tomorrow will worry about itself. Each day has its own worries and troubles. If there is not any solution to the some problem then do not waste time worrying about it.

And if there is a solution to the problem then why waste time worrying about it. Worry will never rob tomorrow of its sorrows, but will only deny today of its meaning happiness and joys. Worrying is actually a form of superstition and creates false images in our mind and that is the main reason and cause which makes and leads us to this point of imagination. A human being can survive almost anything, as long as he or she sees the end in sight.

If something bad or good is to happen it is sure to happen, whether we worry or not. Let us put our energy into today and stop worrying about the future and past. We should not foresee trouble, or worry about what may never happen as past is dead and gone forever and future is uncertain and yet to come. The basic facts we should know about worry. The basic techniques to analyze worry and how to break the worry habit before it breaks us. These are the simple ways where we can concentrate and get rid of worries prevailing in our thoughts.

Annalise worry to see and get the reasons and facts of worry. To avoid reoccurrence of worries, concentrate on prayers as prayers are the best source of remedies of the prevailing worries. The more you pray, the less you'll panic. The more you worship, the less you worry. There is nothing that wastes the body like worry, and anyone who has any faith in God should need not to worry about anything whatsoever is to happen in future. We ought to know the basic fundamental of analyzing worries.

Worries create unnecessary thoughts and these are caused by people going in for unwanted decisions, fore hand not even knowing as to when a good decision is made and not even having sufficient knowledge about it. We must first study and after carefully weighing all the facts than only come to a powerful decision. Simply making castles in the air won't solve our problems but add more to our woes. Anxiety and worry can go hand in hand. When anxiety grabs the mind, it is self-perpetuating. Your mind gets clogged with numerous with buts and ifs. Do not worry about your life. Worries are repetitive thoughts associated with feelings of anxiety in anticipation of some negative future event. Yet anxious feelings and the worries that lead to them can prove helpful.

It becomes a difficult problem if you are constantly anxious as it will become a hindrance to your everyday life, rather than motivate you to some good and better things. Never worry alone. Worrying thoughts reproduce faster so one of the most powerful ways to stop the spiral of worry is simply to disclose the worry to a friend. What you will eat or drink; or about your body, what you will wear.

If you know that the circumstance is beyond your control or power change than revise it to your liking. Just try to put a stop-less order on your worries. Don't permit little things which become insects of life to ruin your happiness. Co-operate with the inevitable. Decide just how much anxiety a thing may be worth and refuse to give in anymore. All the happiness is not given in one go it comes slowly and slowly.

If your worries center on, an important relationship in your life, pay special attention to remain positive and be happy. To keep yourself happy, treat your worried thoughts as valuable signals. How to keep from worrying about criticism? Simply unjust criticism is often a disguised compliment.

It often means that you have aroused jealousy and envy. Let's keep a record of the fool things we have done and criticize ourselves. The utmost cause of worry is your state of depression. Worries are there to motivate information-gathering and problem-solving. Depression is the inability to construct a future. Depression is inertia. That's the thing about depression: But depression is so insidious, and it compounds daily, that it's impossible to ever see the end. Depressed people think they know themselves, but maybe they only know depression. There are no hopeless than this to get depressed.

Our attitude towards suffering and depression becomes very important because it can affect how we cope with suffering when it arises. Depression is nourished by a lifetime of un-grieved and unforgiven causes. Never worry about your heart till it stops beating. How can you deal with anxiety? You might try what when you did. A person worried so much that he decided to hire someone to do his worrying for him. Times will change for the better when you change. Worry is a misuse of the imagination. Worry is most often a prideful way of thinking that you have more control over life and its circumstances than you actually do.

To keep yourself happy, treat your worried thoughts as valuable signals. These are the fundamental facts you should be familiar about worries. A huge factor to stay happy is to cater your worries around, an important relationship in your life and pay special attention sustaining positive relationships. Worries are there to motivate information gathering and problem-solving. Make your mind firm and do come to a positive decision as come what we will not allow the worries to entire our mind and soul. Once a decision is carefully reached we should get busy carrying out our decisions and should not bother about all the anxieties that are about to come. When we, or any of our colleagues or associates, are about to worry about a problem, we must write it out and think of the following questions:

Instead of worrying about what people say of you, why not spend time trying to accomplish something they will admire. What if we just acted like everything was easy? How would your life be different if you stopped worrying about things we can't control and started focusing on the things we can? Let today be the day. You free yourself from fruitless worry, seize the day and take effective action on things you can change.

CHAPTER 14

THINK POSITIVE AND TAKE STEPS FOR GOOD AND HAPPY LIVING

Positive thinking is not about putting on a pair of rose-colored glasses and ignoring all the negative things you will encounter in life. That approach can be just as devastating as ignoring the positive and only focusing on the negative. Balance, with a healthy dose of realism, is the key. So what can you do when you find yourself overwhelmed with negative thoughts? Start with small steps. After all, you are essentially trying to cultivate a new habit here, the secret of successful and happy life lies in keeping ourselves smiling and the character which is the foremost important reason that lies within us. Do not be curious about anything, but in everything, by prayer and petition, with thanksgiving, present your requests to God. Whenever your mind is tempted to jump the fence and start to worry, say this verse aloud or to yourself. You may even have to repeat it over and over again. Am I constantly striving to see the positive in every aspect of my life? Steps for a successful and happy life.

Step One:

Watch carefully for negative self-talk. When your inner monologue starts suggesting that you will never get your assignments done on time or that the work is too hard, find a way to take a more positive view of the situation. For example, if you are struggling to finish a research paper on time, look for ways that you can rearrange your schedule to make more time for the project rather than giving into hopelessness.

When a homework assignment seems too difficult to complete, see if taking a different approach to the problem we need to believe that a Positive Attitude is a choice. This step is hard to take. People are either positive or negative. They tend to blame their negativity on all kinds of outside forces—fate, experiences, parents, relationship, but never really stopped to think that they could choose to be positive. Piercing ourselves that positivity is a choice has been one of the greatest things we have ever done for ourselves. Now when we find ourselves in a bad situation, we know that it's up to us to find the good, to be positive regardless of what's happening around us. We should no longer point fingers and place blame to anyone else. We need to realize that everything happens how it happens, and it's up to us to choose how we want to feel about it. We need to be in control of our attitude, and no one can take that away this from us.

Step Two:

Get Rid Your Life of Negativity

Negativity is contagious and spreads like fire. It not only does its affect anyone, but it spreads to everyone who ever comes in contact with it or whoever they interact with. When only the negative perspective is in focus, the resolution process is impeded. Eliminating negativity, or rather, being positive is a mindset that can be found at any moment, and which can be turned into a habit. If we want to live a positive, joyful life, we must not be surrounded by negative people who don't encourage our happiness. As a negative person, we ought to get attracted too negative people only.

Only when we decide to make the change to live a more positive life, we have to get rid of our lives of the most negative influences in it. We are quite aware of the fact that no one is perfect and perfection isn't the goal when it comes to positivity but there were people in our lives who were consistently negative, who constantly bring us down, we need to stop spending so much time with them.

We can very well imagine, it is not easy for us to get away from these negative people. It can hurt us to keep distance from people even when you know they aren't good for us and for our current lifestyle. In addition to removing negative influences from them, we also have to get rid of some of our own negative behaviors, such as the drug and alcohol abuse. We need to take some concrete steps and examine which behaviors are good for us and which were not harmful. What we need is to learn to focus on the positive things, such as working on positive activities and cultivating new, positive relationships. We must let go of the negative ones. This process may be not easy to live a positive life when negative people and behaviors continually pull us down.

Step Three: Look For the Positivity in Life

The real test of any one is to remain positive whenever some challenges become difficult. Remaining positive keeps our mind in the right state of balance and often opens resolutions to the problems at hand. We must throw away the negativity in us and opt for being a very positive person. In every situation or in every person there is something good. Most of the time it's not easy to find the positive qualities but we have to look hard to discover positivity in them. Now, when we are faced with a difficult or challenging situation, we need to think and talk to ourselves and console our mind, no matter how terrible the situation might seem, we can always find something good if we take the time to think about it. It is quite obvious that anything good and bad is learning experience so, at the very least, we must learn from bad experiences. However, there's usually even more to it than that. If you really take some time to have a look at it, we would find something good, something genuinely positive, about every person or situation.

Step Four: Reinforce Positivity in Yourself

Once we start thinking more positively, we will realize that we had to reinforce these thoughts and behaviors within ourselves so that we could stick to it. As with any sort of training, the more we practice, the better we get to be positive. The best and easiest way to do this is to be positive when it comes to who we are. We need to speak to ourselves that we are awesome. And we have done a good job at work thus creating positivity within us. We need to be honest with ourselves, and we need to do our best to look for the good. And, whatever we do, we must not focus on the negative. It is alright not to like everything about ourselves, but don't focus on what we don't like. We have all the positive attributes, and it's up to us to remind ourselves of them every day.

Step Five: Share Positivity with Others

Not only do we need to be positive with ourselves for this multiple action to take effect, but we need to be more positive with others. We have to share our wealth of positivity with the people of the world. The best way is to be nice with other people, no matter what.

Tell them that they look nice today. Appreciate their job and tell them that have done a great job on that assignment. Be positive and tell your elder or your kids how much you love them and how great they are. When someone is feeling down, do what we need to do is to cheer him or her up. Do send them gifts nice flower and glow them with nice notes.

What is required is that we never wanted to see the good in ourselves and, therefore, didn't want to see it in others also. We must not be critical and condescending rather we must be encouraging and supportive. We should not try to treat others as we would like to be treated, but also try to consider how we would like to be treated.

CHAPTER 15

WHAT DO YOU GET OUT OF BEING NEGATIVE

If you are interested in getting more success and happiness within you, focus on all the ways as if you have already attained success. You need to focus on the thing and create a happy life within you. If you want love and affection, focus on all the people and the abundance of love that you have to give to them. If we want to have greater health, focus on all the ways that we are healthy, thus creating and delivering a good life within you.

You need to admit that there are problems that you cannot change. But you can change the way of your thinking if you identify the main reason of the problem. And if you acknowledge the facts, that you have been negative or inactive in finding a solution to the problem, probably this will make it easier for you to become positive thus creating a new lease of life within you. It will make your life easier to lead a good and sweet life.

You must try to make goals

You must try to make goals. Making goals can give you a more positive outlook on life. People often tend to get bored with life and get the feeling that they are stuck to negative things which the result they often get the feeling of being depressed. Setting a direction for yourself and a goal would surely help you to move forward. If you expecting to succeed, and are not afraid of failure, you have the best chance of staying positive and can create a very positive life within you. When you, or any of your associates, are tempted to worry about a problem, write out the solution and a definite answer to it. This helps a positive feeling to generate within you making you very positive to have a good living.

Another thing you need to understand is that there are several ways to cultivate a mental attitude that can bring you peace and happiness and can carnage a good life within you. More of it if you fill your mind with thoughts of peace, courage, health, and hope, your life will be easy to live. You would get a happy feeling of life and mind if you let yourself to forget your own unhappiness, by trying to create a little happiness for others. You are best to yourself and to others.

The first step is to write down your worries

The first step is to write down your worries, which will help you make sense of them, and then decide on one small step you can take towards a solution. But to be very true no man in this world is free of obstacles or difficulties. Don't make worry your habit. Break this habit and stop all the negative and panic thoughts provoking your mind all the time.

If you can't change the past, but you must not ruin the present by worrying about the future. Joy is what happens to us when we allow ourselves to recognize how good things really are.

If you are interested in getting more success and happiness

When we feel worried and depressed, we need to consciously form a smile on our faces and act upbeat until the happy feeling becomes genuine reality. Happiness is what is needed most. What makes to lead a happy life is not to get trapped into unnecessary unwanted worries and negative thoughts.

Don't create the feeling of depression and anger.

Feelings of depression and hopelessness and or anger are even tougher to cope with on a consistent basis. When you are worried, you not only hurt yourself, but the limited support systems that are still holding on your mind but making you to get more and more worried and nothing is achieved in terms of success except the re-carnation of worries and worries thus leading you to be unhappy and worried all the time.

Your actions breed confidence and courage. If you want to conquer fear, anger and worry do not sit ideal and just think about it. Let our deep worrying become advance thinking and planning. If you look into your own mind and heart, and you find nothing wrong there, what is there to worry about? Practically nothing what is there to fear about and again nothing? So why worry unnecessarily and make your present and future dark. Neglect all those which make your life unhappy.

Why being a negative person?

Why being a negative person and what do you get out of it being a depression dejected and sad man.? Why not turn your thoughts to be a positive person simply it is a question of tilting your mind towards a positive side of thing. See both the aspects of a situation and ways the pros and cons of both the sides and try to abolish the negativity in you.

Be positive strong and you will remain happy for ever. We all have different roles that we play in the lives of people we love and care about. Our actions and how well we play our part has a direct influence on their life, so we better get in there and give our best performance. Tell them with how much you care in the capacity that you're in. At the end of the day, money is just a means to an end. Nothing more.

If you're grinding and struggling to make ends meet and buried under piles of debt, that's pretty stressful. Once you have your basic needs met though, more money only makes you happier up to a certain point. Money cannot buy you happiness. You need to generate it yourself. Someone will always be better than you at something, but it does not matter. Be inspired by them, using it to push yourself further, and nothing more. If they can do it, why cannot you?

Are you are interested in getting more happiness?.

If you are interested in getting more happiness focus on all the ways as if you have already attained success. You need to focus on the thing and create a life within you. If you want love and affection, focus on all the people and the abundance of love that you have to give to them.

Worrisome thoughts reproduce faster.

Worrisome thoughts reproduce faster so one of the most powerful ways to stop the spiral of worry is simply to disclose the worry to a friend. Practice happy gratitude daily. Take three minutes at the end of your day to chill and write down a small list of the things that can make you smile, laugh, or that you're glad are a part of your life. There's something to be grateful about, especially when you look down at that list and realize that a lot of people have it worse off than you do and could use a few of those things. Simply being an optimist will not solve all your problems, but what's the alternative is to keep your mind and heart cool and always have happy and positive feeling and think that life is to live happily.

There isn't much sense in being anything else. If you're constantly filling your head with negative thoughts, odds are they'll lead you straight towards negative actions, self-doubt and increase the general happiness of life isn't a cool place to live at all. Think of each setback as a challenge to see the positive, spin the situation back around, making it better than it was before and start living in a good and sweet manner.

What do we get out of unhappiness?

We may feel largely uncomfortable, when worries attack our thoughts and mind. While we are consuming more worries we are far too busy to do anything else to fix the real problem and would rather find it hard to get into a smart solution. Thus resulting in a fact that you spend your evenings worrying only without even bothering to find some time to know its cause We get nothing out of worrying except only to think and cry and become unhappy. We do not get anything out of unhappiness.

We have intake of lot of greens vegetables and with variety of fruit and nuts which are all super healthy food for us, and which are less expensive than meats, cheeses, and processed foods! Their nutritive value will energize and elevate our body, and knowing this that we are treating ourselves will surely refresh our minds. If we look for rich food rich in vitamins and other useful ingredients which include nuts, soya beans and fatty fish we would get more nutrition value. We must cut back on the caffeine drinks, alcohol. We don't have to quit, but reducing the intake of them will help reduce anxiety and stress from time to time.

Exercise is one of health sport that our body needs most. It may be yoga, cross training, or even a simple walking in the park. This helps keeping our body active and will also help to grow our outlook. If we make it hobby we would enjoy the most. Whether its art, photography, music focusing on something other than the worry factor it will give our mind some good atmosphere to breathe off and would generate a good behavior within us. The other refreshing factor is naturally our sleep. We need not be reminded of this. Our body is probably begging us for it when we are in the middle of hard times. We may be drawn to maintain good sleeping habits.

Maintain a consistent sleep schedule, but allow yourself some leeway. If we sleep peacefully let our body get about 8 hours of sleep we get the best results. If you're just starting to have those thoughts, speak to your physician or your therapist. They may prescribe something to help steer you back to the center, emotionally. It may be the act of talking about it is therapeutic enough, but don't assume that. Leave that call to the professionals. Nothing stays the same. Whether you are positive or negative, the situation does not change. So, we mind as well be positive. As with any habit, the habit of remaining positive in all situations takes practice and a commitment to yourself to take control. But start small, start paying attention to your emotions, start by wanting to change. Don't hold onto anything that bothers your mind. Every time the thoughts come back into your head, see yourself with the eraser again. Therefore do not worry about tomorrow, for tomorrow will worry about itself. Each day has enough trouble of its own. Do not anticipate trouble, or worry about what may never happen. Keep in the sunlight. Imagine every day to be the last of a life surrounded with hopes, cares, anger and fear. The hours that come unexpectedly will be much the more grateful. The mind that is anxious about future events is miserable. Present fears are less than horrible imaginings.

Let us be of good cheer, remembering that the misfortunes hardest to bear are those that never happen, focus on the positive aspects of their lives, rather than on the negative setbacks. "Feeling confident affects the way we perceive our situations and how we decide to manage them. Don't waste your life in doubts and fears: spend yourself on the work before you, well assured that the right performance of this hour's duties will be the best preparation for the hours or ages that follow it. It is not work that kills men, it is worry. Work is healthy; you can hardly put more on a man than he can bear. But worry is rust upon the blade. It is not movement that destroys the machinery, but friction. Never let life's hardships disturb you ... no one can avoid problems, not even saints or sages. As with any habit, the habit of remaining positive in all situations takes practice and a commitment to yourself to take control. Life is what you make it, so make it a happy one!! Don't worry on things that may not happen, life is too short to worry too much. Smile and be happy

First of all our circle of friends is always there to give us some moral support. Spending time and engaging ourselves in worthwhile activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support. Good friends are quite important and their company generally lightened up our spirits. Worries and anxious feelings lead to disasters and make our lives unhappy. If we know that our circumstances are beyond our control or power we need to change them or revise them to our liking. We must try to put a stop-less order on our worries. We must be careful and we need not permit little things which become insects of our lives to ruin our happiness.

Co-operate with the inevitable. Decide just how much anxiety a thing may be worth and refuse to give in anymore. All the happiness is not given in one go it comes slowly and slowly. We must pay special attention to remain happy and be happy. Keep ourselves happy, treat our worried thoughts as valuable signals to a sweet living good and happy living.

The utmost cause of unhappiness is your state of depression. Unhappiness is not there to motivate information gathering or problem-solving. In fact it is depression that constructs the future of unhappiness. Depression is inertia. That's the thing about depression: depression is so insidious, and it compounds daily, and it's impossible to ever see the end of it.

Keep yourself happy

Depressed people think they know themselves, but maybe they only know depression. There are no hopeless than this to get depressed create unhappiness in our minds and become unhappy all the time. Our attitude towards suffering and depression becomes very important because it can affect how we cope with suffering when it arises. Depression is nourished by a lifetime of grieved and unforgiven causes. Another factor to remain unhappy is worrying about unwanted and useless things. Worry is a misuse of the imagination. To keep yourself happy, treat your worried thoughts as most unwanted assets. These are the fundamental facts you should be familiar about worries. A huge factor to stay happy is to cater your worries around, an important relationship in your life and pay special attention sustaining positive relationships. Make your mind firm and do come to a positive decision and not allow the worries to un-ease the power your mind and soul that can cause unhappiness in you.

We must free ourselves from fruitless worry.

Once a decision is carefully reached we should get busy carrying out our decisions and should not bother about all the anxieties that are about to come. When we, or any of our colleagues or associates, are about to worry about a problem, we must write it out and think of the following questions: Instead of worrying about what people say, why not spend time trying to accomplish something they may admire. What if we just acted like everything was easy? How would your life be different if we stopped worrying about things we can't control and started focusing on the things we can? Let today be the day. We must free ourselves from fruitless worry, seize the day and take effective action on things we can change thus we would see that our lives changes for the betterment and we are on the right path of a sweet, good and happy living.

CHAPTER 20

STEPS FOR POSITIVE LIFE

The secret of successful and happy life lies in keeping ourselves smiling and the character which is the foremost important reason that lies within us. Do not be curious about anything, but in everything, by prayer and petition, with thanksgiving, present your requests to God. Whenever your mind is tempted to jump the fence and start to worry, say this verse aloud or to yourself. You may even have to repeat it over and over again. Am I constantly striving to see the positive in every aspect of my life?. Steps for a successful and happy life.

At time we may think that there is no road is left for us from were we can achieve the happiness of our lives. We may also feel that life has become terrible for us to live and we are carrying new hope that someone would come to rescue us. There may be chances that someone who was there with us before might have held on to us when we were on the dark side of the life.

We should not forget that happiness in life comes through the doors of positive thoughts; we need to have them first. If one door happen to close, another opens, in the event only when we are confident and optimistic. We have so many reasons to cry and at the same time plenty of reasons to smile as well. Similarly, happiness does not stand for anything, but is on our way of thinking that how do we keep ourselves happy in life. Failure and disappointment are part of our life. The only thing is that we need to face and solve the problem is by keeping our dreams and hope alive be it a reason that success and happiness will come our way again.

The experience has taught us that we should buy some strength, hope and positivity from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments we can live with considerable optimism.

What if when everything goes wrong and all the doors of happiness are closed our live becomes a silent. It is a quite common and we are aware of a marvelous proverb that Life itself is a stage and we all are the performers, performing different acts assigned to us by our almighty power. We should not forget as to what is in our possession?, if it is to fulfill our duties towards our responsibility and do whatever is correct and is allowed by us in our life?. However, despite of all these good thoughts which are embodied to us by the almighty fail to revive these unwanted circumstances that lead us to sorrow and difficulties and a situation where we do not know what is correct and good for us and what is wrong for us.

We should always remember that, "Life is there, where there is hope". That single thing that remains in our hands is to find out ways to know how to overcome these worries of our life at that very moment when all doors are closed for us which means that whatever situation is there, we must not give up hope. We must fight because there have been always a chance that with good faith and hard work we can turn the odds in our favor. It is often said that it is very easy to advice but when it comes to us, things go out of our control and we fail to suggest a way out for ourselves.

We fall into the trap of unnecessary worries and elope ourselves with negative thoughts. We feel better when somebody else is facing some difficulty but when it comes to us we fail to gather that faith, will power and the words of strength. It is a common fact that no one in this world is free of obstacles or difficulties. If all the openings of happiness are shut for us and we have to overcome that and have no way to come out, but to survive lest we must have to learn to swim out of the sorrows because this is what is called life and sorrow free living. There are lot more examples and in many other situations, where we will find that how we could have faced and fought with our sorrows and difficulties of life when there was no hope left in our lives.

When the power of will is at the worst and each one of us knows that the one who is gone never comes back. Neither a thousands of words would not be enough to bring him back nor a million tears, because each and every moment, eyes would only shed tears , mind would remain tensed and we would be simply surrounded by worries and the life seems to have been vanished. Life is ever expanding, contraction is death. As commonly said by big saints that the self- seeking man who is looking after his personal comforts and leading a lazy life for himself there would be no room for him even in the hell and he simply have lost the power of his will. We are quite aware of the fact that faith in oneself is the history of a man and that faith calls the quality of superiority within a person. One cannot do anything without it.

We fail only when we do not try very hard to achieve the power and faith within us. As soon as we lose faith, death comes in our way and we are surrounds by all the evils and stupid worries of the world. The secret and history of every successful man is to have, good confidence, faith and strength behind him and that remain the right cause of his single success in life. Unselfishness plays a very vital role in his life. He may not have been perfectly unselfish, yet he was tending towards it. If he had been perfectly unselfish, he would have been as great a success. The degree of unselfishness marks the degree of success everywhere and he leads to be successful man without fear worries and selfishness. There are quite a number of reasons to believe that for a successful and happy life the mystery surrounding it lies in our interests, and good memory which is the basis of our interest, power of desire and aim, keeping ourselves smiling and the doubt free character which is the foremost important reason for a successful and happy life. If we possess one solid unselfish and doubt free character within ourselves we would be quite happy and successful.

The love for God and worshipping God adds to one common thing the immense faith in Him. There may be different beliefs and ways to worship God in different communities, places and religions, but one thing remains the same and that is the Love of God for all of us. Our world is full of odds and evens, happiness and sorrows, fulfilment and emptiness. And these are all created by the Almighty. However, the most beautiful Gift of God, is Human, which is such a mystery driven by Him which could hardly be defined or explained in depth.

We know that life cannot be foreseen. Life is not a bed of roses. Life is a battle field and not a bed of roses as every man on earth has to struggle very hard in making his life happy. If aim of our life is to stay happy and let others to be happy, we will be happy and remembered by all. But no one will actually remember us for the wealth we have gained, or success we have achieved. I have no aim in life. Summary living with no purpose in life is just like a feather moving towards the wind.

Both career and purpose are different issues but it is equally important to understand the value of these things which would ultimately add spicy flavor to your living. Innovation at work place is what is necessary how well we judge our work, how good we like and enjoy it. If we take our work as a stiff challenge and as learning everyday then we would start loving it and giving our best. However, if we just work for the sake of then nothing is realized and we do not remain happy in life.

Life is such a special gift of Almighty and it is not gifted by Him to use it the way we like or love to. The actual path shown by Him needs to be followed by us for us to reach the peak of betterment every moment. We need to have some positive attitude to look at it comfortably but at the same time having a positive mental attitude does not mean banishing all negative thoughts and people from your life. The same is true with thoughts. When we go to field with negative thoughts, we banish one and another one arises.

Therefore creation of positivity in life is utmost necessary to enjoy the special gift of God to us. Now let's us imagine that we are not feeling at our best today, and we are having thoughts that could be classified as negative. We shouldn't be thinking such negative thoughts. We don't like the negative thoughts. We ought to know that negative thoughts are stressful, demoralizing and depressing. We shouldn't aim to have negative thoughts at all. Often we feel uncomfortable because we think we have to say or do something in response to another person's words.

When we find ourselves thinking this way, it helps enormously to take a few moments to check inside and notice what we are feeling. We are deeply depressed that negativity has governed us and has taken a deep root in our minds. If we want to live a positive, joyful life, we must not be surrounded by negative people who don't encourage our happiness. As a negative person, we ought to get attracted too negative people only. Only when we decide to make the change to live a more positive life, we have to get rid of our lives of the most negative influences in it. We are quite aware of the fact that no one is perfect and perfection isn't the goal when it comes to positivity but there were people in our lives who were consistently negative, who constantly bring us down, we need to stop spending so much time with them.

We can very well imagine, it is not easy for us to get away from these negative people. It can hurt us to keep distance from people even when you know they aren't good for us and for our current lifestyle. In addition to removing negative influences from them, we also have to get rid of some of our own negative behaviors, such as the drug and alcohol abuse. We need to take some concrete steps and examine which behaviors are good for us and which were not harmful. What we need is to learn to focus on the positive things, such as working on positive activities and cultivating new, positive relationships. We must let go of the negative ones. This process may be not easy to live a positive life when negative people and behaviors continually pull us down.

In every situation or in every person there is something good. Most of the time it's not easy to find the positive qualities but we have to look hard to discover positivity in them. Now, when we are faced with a difficult or challenging situation, we need to think and talk to ourselves and console our mind, no matter how terrible the situation might seem, we can always find something good if we take the time to think about it.

It is quite obvious that anything good and bad is learning experience so, at the very least, we must learn from bad experiences. However, there's usually even more to it than that. If you really take some time to have a look at it, we would find something good, something genuinely positive, about every person or situation. Once we start thinking more positively, we will realize that we had to reinforce these thoughts and behaviors within ourselves so that we could stick to it. As with any sort of training, the more we practice, the better we get to be positive. The best and easiest way to do this is to be positive when it comes to who we are.

We need to speak to ourselves that we are awesome. And we have done a good job at work thus creating positivity within us. We need to be honest with ourselves, and we need to do our best to look for the good. And, whatever we do, we must not focus on the negative. It is alright not to like everything about ourselves, but don't focus on what we don't like. We have all the positive attributes, and it's up to us to remind ourselves of them every day.

Not only do we need to be positive with ourselves for this multiple action to take effect, but we need to be more positive with others. We have to share our wealth of positivity with the people of the world. The best way is to be nice with other people, no matter what. Tell them that they look nice today. Appreciate their job and tell them that have done a great job on that assignment. Be positive and tell your elder or your kids how much you love them and how great they are. When someone is feeling down, do what we need to do is to cheer him or her up. Do send them gifts nice flower and glow them with nice notes.

Worries make you to move into tomorrow ahead of time. Half the worry in the world is caused by people trying to make decisions before they have sufficient knowledge on which to base a decision. Their negative thoughts pressurise them to be away from the positivity in their lives as they fail and do not analysis on positive and they fail to lead a happy life or sweet life.

Why worry about tomorrow. Concentrate on today happening as for tomorrow will worry about itself. Each day has its own worries and troubles. Always think that you are a happy man. The third step is to focus your imagination on happy things in life by giving a good smile.

The easiest way is feeling happy. Many theories have revealed that happiness can lift one's mood and can divert your mind to sweet living. We may also share positivity with others by flashing them with a brilliant and good smile. Positive and sweet talks are the rewards of good and happy thoughts it generates more happiness. Dejection, disappointments and depression, however, have consequences that could ruin our health, and life.

We must divert their minds to focus to the imagination of good and happy life. If something bad or good is to happen it is sure to happen, whether we are sad or unhappy or depressed. Let us put our energy into today and stop worrying about the future and past. We should not foresee trouble, or worry about what may never happen as past is dead and gone forever and future is uncertain and yet to come. Be your unabashed self in all the best ways that you can.

The basic facts we should know about happiness.

The basic techniques to analyze happiness and how to break the unhappy habits before it breaks us. These are the simple ways where we can concentrate and get rid of unhappy thoughts. Annalise unhappiness to see and get the reasons and facts as to why we worry. To avoid reoccurrence of worries, concentrate on prayers as prayers are the best source of remedies of the prevailing worries. The more you pray, the less you'll panic. The more you worship, the less you worry. There is nothing that wastes the body like worry, and anyone who has any faith in God should need not to worry about anything whatsoever is to happen in future. This will ease our way to a sweet good and happy living.

What do we think about happy thoughts?

The feeling of happiness is within us. It is said that sweet good and happy living is purely our own matter and it has nothing to do with our external circumstances. There is something very special within us which keeps us happy and there is something very unpleasant within us which keeps unhappy. Yes quite true it is the positiveness within us that make and creates happiness within us. Happy living through positivity is nothing more than that of living a normal life free from undue pressures, problems and tensions. If we want to live a happy life then we need to get rid of the negativity and we must try to avoid all the unpleasant things within us which makes us unhappy.

Negative approach always complicates the problems and increases unhappiness.

Most of us do the fatal mistake of looking outwards for happiness rather than looking inwards. Be happy, be strong, be bold and be courageous every day. Even if we are having a bad day, think of some good things that may come our way, either later that day, tomorrow, next week, month, or next moment.

Simply making castles in the air won't solve our problems.

When everything seems to be beyond our control, it's almost too easy for us to slip into the grasp of unhappiness. To avoid unhappiness we must strive to abolish this sort of thinking through the power of thinking positively.

We ought to know the basic fundamental of analyzing happiness. Worries and unhappiness create unnecessary thoughts and these are caused by people going in for unwanted decisions, fore hand not even knowing as to when a good decision is made and not even having sufficient knowledge about it. We must first study and after carefully weighing all the facts than only come to a powerful decision. Simply making castles in the air won't solve our problems but add more to our vows and unhappiness which may even lead us to unhappy life. Anxiety and worry can go hand in hand. When anxiety grabs the mind, it is self-perpetuating. Your mind gets clogged with numerous buts and ifs. Do not worry about your life.

Negativity and worries are repetitive thoughts

Negativity and worries are repetitive thoughts associated with feelings of anxiety in anticipation of some negative future event. Worries and anxious feelings lead to disasters and make our lives unhappy. If we know that our circumstances are beyond our control or power we need to change them or revise them to our liking. We must try to put a stop-less order on our worries. We must be careful and we need not permit little things which become insects of our lives to ruin our happiness. Co-operate with the inevitable. Decide just how much anxiety a thing may be worth and refuse to give in anymore. All the happiness is not given in one go it comes slowly and slowly. We must pay special attention to remain happy and be happy. Keep ourselves happy, treat our worried thoughts as valuable signals to a sweet living good and happy living.

The utmost cause of unhappiness is your state of depression. Unhappiness is not there to motivate information gathering or problem-solving. In fact it is depression that constructs the future of unhappiness. Depression is inertia. That's the thing about depression: depression is so insidious, and it compounds daily, and it's impossible to ever see the end of it.

Keep yourself happy

Depressed people think they know themselves, but maybe they only know depression. There are no hopeless than this to get depressed create unhappiness in our minds and become unhappy all the time. Our attitude towards suffering and depression becomes very important because it can affect how we cope with suffering when it arises. Depression is nourished by a lifetime of grieved and unforgiven causes. Another factor to remain unhappy is worrying about unwanted and useless things. Worry is a misuse of the imagination. To keep yourself happy, treat your worried thoughts as most unwanted assets.

Instead of worrying about what people say, why not spend time trying to accomplish something they may admire. What if we just acted like everything was easy?

We must free ourselves from fruitless worry, seize the day and take effective action on things we can change thus we would see that our lives changes for the betterment and we are on the right path of a sweet, good and happy living.

Negativity is a habit and we often don't realize we're doing ourselves down. Under each negative thought that we have written, we can spot an alternative way of looking at it, that isn't so negative. Take your mind to positivity and mold and drive your thoughts to the positivity.

There's a world of difference between expecting failure or rejection so as not to be disappointed when it occurs and recognizing it as a possibility of being positive. It's sensible to look at a situation from all angles and to have a back-up plan to fall back on if need be. People who do this will not see failure as another step on the road to eventual success; but by expecting and envisioning success, there's less likely to be a failure. Let us find some ways of removing negative thoughts and discouraging our worries to be born.

Let us all generate and create happiness within us

Let us all generate and create happiness within us by removing all negative thoughts negative feeling and unwanted desires that make our mind greedy and spoil the charm of our sweet good and happy living.

CHAPTER 22

HAPPY LIVING IS NECESSARY

Remember three aspects - naturalness, simplicity and belongingness. Just open up your heart and be natural. Next is living a simple life. Living with the confidence will get whatever is needed, that is simplicity. Right or wrong, we are what we are. We need to tone our life accordingly and if we live like this naturally, then there will not be any fear. There will be no doubts or blocks in life. This is the important mantra of Art of Sweet Living.

Another important thing is that if we cannot get some good sunshine, we can always lighten up our thoughts with brighter lights of happy living. We can have ample of lunch of positive thinking. To avoid negative thoughts we need to take frequent walks. No man is indispensable and no man is not capable of positive thinking. Let us make ourselves happy and life become a sweet living.

Happiness is a state of mind.

We know the saying, that “Happiness is a state of mind”. And state of mind is what we think and what we do or act in a peaceful manner without being getting worried or depressed.

If you are interested in getting more happiness, to get it through positive thinking. All we need to do is to focus on all the directions on positive thinking and happy living as if we have already attained success. We need to focus on the thing and create a life within us. If we want love and affection, entertain people and give them the abundance of love. If we want to have greater health, pay attention on all the ways that make us healthy, thus creating and delivering a good life within us by thinking in positive ways.

We need to understand and admit that there are problems that we cannot change. But we can change the ways of our thinking and if we identify the main reason of the problem we can remove all the obstacles coming in our way of leading a sweet and happy life. And if we acknowledge the fact, that we have been negative or inactive in finding a solution to the problem, this will make it easier for us to become positive thus creating a new lease of life within us.

Positive thinking will surely make us happy.

Another thing to understand is that we must try to make our goals. Making goals can give us a more positive outlook on life. People often tend to get bored with life and get the feeling that they are stuck to negative things with the result they often get the feeling of being depressed dejected and monotonous and become unhappy in life. Setting a direction and a goal for ourselves, would surely help us to move forward. If we are expecting to succeed, and are not afraid of failure, we stand the best chance of staying positive and thus can create a very positive life within us.

Mental attitude that can bring you peace and happiness.

Another thing you need to understand is that there are several ways to cultivate a mental attitude that can bring you peace and happiness and can carnage a good life within you. More of it if you

fill your mind with thoughts of peace, courage, health, and hope, your life will be easy to live. If you think in positive terms you would get a happy feeling of life and mind you if you let yourself to forget your own unhappiness, by trying to create a little happiness for others you are sure to get happiness in your live. You are best to yourself. The perfect way to conquer worry is the Prayer of God. You should do things in the order of their importance.

Learn to think in positive terms.

When you face a problem, solve it then and there, by thinking positively and if you have the facts of making a decision, make a decision fast and do not linger on. Learn to think in positive terms organize the things, deputise, and supervise straight away by coming to decision. To keep yourself from worrying about criticism, do not even try to get mixed with your enemies, because if you do you will hurt yourself far more than we hurting them. You will fall prey to negative thinking and this in turn will lead you unhappiness in life.

Simply postponing it would spoil your good thoughts and there is every likelihood your mind may get into negative activities and start thinking in negative manner. Therefore think positive, write down a list of things that make you positive, however big, small, likely or unlikely.

Then work to make them occur more often. Look for moments of joy and savor them. Recognise your good happening every day. Be positive think positive and be happy.

Happiness is your own choice and decision

You may also feel that life has become terrible for you to live and you are carrying no hope that someone would be there to rescue you. Happiness is your own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts.

Our friends are always there to give us some moral support. Spending time and engaging ourselves in worthwhile positive activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support and talking in terms of positive thinking. Good friends are quite important and their company generally lightened up our spirits. This makes us to think in positive manner and to get to know such friends we simply have to be friendly with ourselves, and then the friendships will naturally follow us and make our lives happy.

Only way to find happiness is not to expect gratitude.

Let us remember that the only way to find happiness is not to expect gratitude, but to give for the joy of giving. Let us build a happy life within us generate peace and a healthy atmosphere around us. This will help us to lead a peaceful happy and prosperous life and we would find ourselves to be happier than before. We need to understand the power of positive thinking and its support and we have not to underestimate it strength and support. Don't we feel so good when someone pats us on our back and gives us some words of encouragement during your most challenging times and difficult times and advises us to remain positive and think positive just hug or embrace someone with positive attitude someday we will see that we have almost changed our life.

The ghosts of the past have to be exorcised. We may be working in any field, the key to success is our outlook. Sometimes we may think that no road is left for us from where we can achieve the happiness of life. One need not to forget that we need to eat well do plenty of exercise and do not skip meals It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety, so we need to walk, swim, run or whatever we like doing best above all we must move ahead in direction where our mind can generate electricity to think in positive directly and bring immense happiness to us

Difficulties and storms may come and go.

In our lives difficulties and storms may come and go in the form of reversals, but if we have the power of positive thinking and foundation of inner fulfillment we would be able to deal with it with a very clear practical mind and with this positive thinking these storms will not kill us nor will disrupt us. There could be numberless reasons for which we keep on worrying.

We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry if we generate within ourselves the power of positive thinking within ourselves and try to be happy all the time.

The best thing about happiness is that we get it is free.

We don't have to pay or we do not have to open any account to be happy. We don't have to pay monthly rent for it either. WE just have to change our perspective, our views on what we are seeing and feeling. Happiness is not something which is quite readymade. It comes from our own actions and deeds.

Angriness and happiness don't mix.

We must dig out the angriness in us, and see that the happiness has shown and seeded a place to grow its roots. The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy.

If you want to be happy, be positive first practice meditation.

Laugh when you can, apologize when you should, and let go of what you can't change. Think positive and just visualize that what is stored in destiny would not be negative. If you want to be happy, be positive first practice meditation. If you want, others to be happy practice compassion. Whoever is happy will make others happy, too.

Happiness doesn't depend on any superficial conditions.

Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, we radiate happiness to the world.

We need to visualise our light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and you shall form an invincible host against difficulties.

The path to happiness is forgiveness.

The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything. Happiness fills our heart each day and our whole life through with clean thoughts. Any day would be a wonderful day if we do not take life so seriously. Happiness is not about being a winner it is about being gentle with life being gentle within us.

Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world. When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing.

First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Imagine that you are already a positive person and you love life.

Happiness can only be achieved if you have a positive mind.

The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts. Absence of positive thinking, has eluded us of our great happiness and left us far behind. This very little known fact has kept many of us from reaching our goal of happiness. Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity.

Happiness is a state of mind only and not the thoughts of negatives, and it quite true that happiness can only be achieved if you have a positive mind and a clear attitude of being a positive person. Happiness and positivity go hand in hand. If you are positive you are a happy person and if you possess negativity you would land yourself to be a very negative person thus ruining your life for what of nothing with the result you become an unhappy person and you remain aloof from leading a sweet good and happy living.

CHAPTER 23

DISCARD BAD LIVING AND HAVE GOOD THOUGHTS

Happiness is our own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts. The ghosts of the past have to be exorcised. We may be working in any field, the key to success is our outlook. Sometimes we may think that no road is left for us from where you can achieve the happiness of life. There may be chances that someone who was there with us before might hold on to us when we are on the dark side of the life.

Positive thinking and happy living is state of mind.

Positive thinking and happy living is state of mind and happiness is something we cannot earn or buy. We need to remember that people and things alone, won't make us happy. Our own efforts not to get worried or depressed make us happy. Positive living make us happy. We ought to remember the saying, that "Positive living along can bring happiness as it is a state of mind".

The ultimate goal of life should be to get happiness.

The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy. Laugh when we can, apologize when we should, and let go of what we can't change. Let us think positive and just visualize that what is stored in destiny would not be negative. If we want to be happy, practice meditation. If we want, others to be happy practice compassion. Whoever is happy will make others happy, too. Thus we can lead our path to happy sweet and good living.

Our greatest gift to others is to be happy.

Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, we radiate happiness to the world. We need to visualize our light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and your joy and you shall form an invincible host against difficulties.

The positive persons often dance to the happy tunes.

The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything.

Happiness fills your heart each day and your whole life through with clean thoughts. Any day would be a wonderful day if you do not to take life so seriously. Happiness is not about being a winner it is about being gentle with life being gentle within you. Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world.

Happiness is not about being a winner it is about being gentle

When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing. First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Happiness is not about being a winner it is about being gentle. The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts.

Throw away all your negative thoughts.

Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity. Positive and happy living is not state of mind only it is the discernment of the negatives thoughts. Be a positive thinker and ignore reality in favor of aspirational thoughts. It is more about taking a proactive approach to life.

Instead of feeling hopeless or overwhelmed, positive thinking and happy living allows to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems. It might not be easy, but the positive person will surely win and lead a sweet happy and good life.

Happiness in life comes through the doors of positive thoughts;

We do not even realize which one is left open. We have so many reasons to cry and at the same time plenty of reasons to smile as well. Keeping our dreams and hope alive might be a reason that success and happiness will come our way again. We ought to know that happiness alone does not stand for anything, but it is on our way of thinking that how do we keep ourselves happy in life. Ending up our lives does not lead us to our destination but of course proves we are supposed to be cowards who know not to unfold the doors of belief in God and in ourselves.

Failure and disappointment are part of our life.

Failure and disappointment are part of our life. The only thing is that we need to face them boldly and courageously and try our best to solve the problem. We must not forget to believe in God whatever our situation may be we need to make our faith strong enough not be let down, rather we would break the knees of sorrows and force it to die and lead happy lives. We should not surrender but must find out ways to come out of our worries, anxieties and difficulties.

We ought not to indulge ourselves into the darkness of the room but find out the doors to free ourselves from unnecessary fear and worries. We must belief in ourselves and our hearts, and believe in the ones who love us and not the ones whom we love. We must not fall on the negative side of a thing.

Happy living is sure to make our life a good and sweet one.

The experience has taught us that we should buy some strength, hope and positive ness from our loved ones to help ourselves in such a situation rather than surrendering our lives to God as it is a precious gift of God which is equipped with full of joy and happiness we need to help ourselves in these critical moments and live with considerable optimism. Happy living is sure to make our life good and sweet.

We should always try to be positive and happy

It is the real time when you keep on revealing the truth of our lives and relations, do not fall on the reverse side but think how good it was that because of the hard times of our lives we could well judge about them. We should always try to be positive and should think that whatever is happening, it is the positive side or consequence of that incident in would be on the positive side of our imagination. With all these thoughts, I would request my readers to implement some good thoughts in their life that would make things easier to be tackled by them. We should accept the situation and fight it with more determination.

In this world nothing is good or bad and only thinking makes it so.

We ought to know that advice from people around us will help us to overcome from the any drastic situation. Also we have to always minimize the stress as it gives nothing but takes away joy and happiness from our lives. And finally we need to take things casually and fight with it seriously.

A clear minded person looks for good qualities in the other person, whereas a negative mind always looks for the fault in the other person and also a negative mind always looks for the fault.

An optimist goes forward keeping in mind the past, a pessimist thinks of the future and reverts back to the past. In fact negative thoughts are our greatest enemies.

Experience the happiness in all circumstances by maintaining better relationships.

Sadness cannot touch a person with a positive attitude. It increases the decision of making power. Creative way of thoughts appears in the mind. Positive thoughts of happy living teach us the art of finding solutions to any problem. Optimism is something what we do. Anxiety and other negative emotions are known to be detrimental to the body, especially to our immune systems, and having an optimistic nature seems to protect against those effects.

People who are supposed to be optimistic, about their future, are sure to lead a sweet good and happy life. Their secret of happiness is that they do exercise, do not indulge in in smoking and often follow a good and better diet.

Whenever we are unhappy, if we analyze the reason for our unhappiness, it is because life is not matching our expectations. We need to experience the happiness in all circumstances by maintaining better understanding and relationships with all.

CHAPTER 24

MAKE YOUR WAY FROM UNHAPPINESS TO HAPPY LIVING

We need to learn a lesson from every situation. No matter how difficult the situation may appear. We should recognize the beautiful lessons waiting to be discovered. Sometimes lessons may prove to be expensive and costly, but every problem is a learning experience in disguise. We need to be conscious of our thoughts, especially, when life just isn't going our way. The moment we see that we are diving into frustration, agony, sorrow or low self-esteem we must shift our thoughts, by thinking about something completely different and unrelated. This will strangle the pattern of self-pity, mind-created imaginations, and negative downward stairs.

Really what makes us different from other mammals is our ability to control our thoughts and think for ourselves positively and shift our negative thoughts to a positive angle. We may have made mistakes, but now we can accept it and continue, knowing that we will make a different decision in the future. If we understand this it can be appreciative for the experience. We cannot be both angry and grateful at the same time. We should start counting the blessings and miracles in our lives and if we start exploring for them and we would find more. We should console our mind as to what's not there to be grateful?. It's quite true that we are alive and breathing!

We have to realize how lucky we are with all the positivity in abundance in our lives. Our mind and body becomes dumb and mum when it comes to pressure, all it wants to do is take the easiest way out and to throw out of us our negative within us.

Feeling good about ourselves and showing self-confidence boosts our skills potential and capabilities in any areas of work and supports us to become more positive. We need to shift our thoughts from being a negative person to more strong a positive man. Also keeping in mind that pushing things to the limit and going beyond what we think is possible for us to get to the next step of being positive. It becomes another key to achieving what we really want to do.

Even if it may even be relationships and we are finding it difficult to meet someone where we are actually interested in, we need not wait because it usually doesn't come to us by own, we must stand up to get help from any learned fellow. One of the most important things while doing all of this is to be happy about what we are doing, thus we ought to have a successful goal setting our lifestyle with a positive attitude. At times we may suffer from chronic depression, though we know how good things look on to others life cannot be worse for us. Let's imagine how to deal when life leaves a great big steaming pile at our doorstep. Lest we need to remember that external factors can be dealt with by taking positive steps to repair or at least address the root of the problem as best as we can. Whatever may be the primary cause of the problem, that cause must be examined first?. We may or may not be able to solve the problem, per se, but at least knowing that we are taking positive steps can help us improve our outlook.

It will not be easy, of course, for us and it may be like suffering a chronic disease thus we must balance ourselves as "being positive" with an understanding that the reality is, it's going to be an ongoing battle for our own survival. Depression will undermine even the strongest of wills, need help to maintain or at least be reminded of a positive outlook.

Counseling, psychotherapy, and the right combination of medication will play a crucial role in helping to keep us from sinking into that very dark place that is the essence of depression. Be patient, but don't look for miracles. It may be that we will need the help of professionals throughout our lives to maintain a generally even keel. If one could "will away" depression, there would be no need of doctors or drugs. What we can do is understand why we feel like we do, and explain to our counselors that we wish it were that easy, and that we appreciate our concern towards positivity. Shifting our thoughts enables us to the right path of our positivity and thinking in its direction of positivity can make us to lead a very happy life.

What is required is that we never wanted to see the good in ourselves and, therefore, didn't want to see it in others also. We must not be critical and condescending rather we must be encouraging and supportive. We should not try to treat others as we would like to be treated, but also try to consider how we would like to be treated. The world likes to appreciate positivity, and the more we share it with others, the more we would be practicing it your own lives. When we start feeling like the idea of not being a positive person we need to remind ourselves that all it takes is one tiny step in the right direction to move towards a more positive attitude.

We have to believe in ourselves and remember the most important lesson of all is a positive outlook and that is a choice that we can always make. The power of remaining positive, whatever the situation, can never be underestimated. We are all here for a short duration, but is it worth it to spend any of that time in a any angry or being negative?. That need to sort out in mind and soul and thus must share our positive thoughts with others.

The real test of any one is to remain positive whenever some challenges become difficult. Remaining positive keeps our mind in the right state of balance and often opens resolutions to the problems at hand. Negativity is contagious and spreads like fire. It not only does its affect anyone, but it spreads to everyone who ever comes in contact with it or whoever they interact with. When only the negative perspective is in focus, the resolution process is impeded. Eliminating negativity, or rather, being positive is a mindset that can be found at any moment, and which can be turned into a habit. We must throw away the negativity in us and opt for being a very positive person.

What is Positive Thinking? The feeling of positivity within us. It is said that positive thinking is purely an internal matter. It has nothing to do with our external circumstances. There is something positive within us which helps us to keep us happy and there is something negative within us which makes us unhappy. Happy living through positivity is nothing more than living a normal life free from undue pressures, problems and tensions.

If we want to live a happy life then we need to get rid of the negativity within us and above all we must start thinking positive which will not make us unhappy. Negative thinking always complicates the problems and increases unhappiness.

Most of us do the mistake of looking outwards for happiness rather than looking inward. Think positive, be strong, be bold and be courageous every day. Even if we are having a bad day, think of some good things that may come our way, either later that day, tomorrow, next hour, month, or year.

When everything seems to be beyond our control, it's almost too easy for us to slip into the grasp of negativity. To avoid negativity we must strive to abolish this sort of thinking through the power of thinking positively. The art of positive thinking is not a complicated kind of art difficult to learn rather a simple art of positive thinking, like eating well, living well and feeling well. What we need to do is just to tune up our mind to enjoy every moment of life and let the positive thinking follow us. This is something that needs to be looked into thoroughly. We need to focus on the positive aspects rather than on the negative setbacks.

We must remember that good and happy living is the reward of positive thinking. We ought to remember, only positive thinking can bring happiness in our lives. If we cannot think positively, we cannot live happily. Being our own teacher or adviser we ought to look everything with a positive angle. Let us find something good even in most critical moments of our life and let us make positive thinking the basis of our happy living. It's a matter of thought that fools worry about the circumstances on which they have no control. Why worry when we cannot change anything or the climate, rather enjoy it whether it's hot, humid, cold, cloudy, foggy and snowy.

Let us all keep our mind body and soul pleasant all the time. A sound and positive happiness is all around. It's not far away from us. If we do not want to live happy, it's up to us. It's our own choice. We must not blame others, nor should we blame our fate or external circumstances. Another thing is that feeling confident affects the way we perceive our situations and how we decide to manage them. Think that by being more optimistic we alter our approaches to situations and take on them in a healthier manner; we think of alternatives and act according to better outcomes.

If we think positive it will be positive. It does not say to stick our heads in the soil; rather it says to think positive. Interestingly it does not say feel positive it says think positive and that is the real meaning to remain happy. Happiness does not come alone, it adds our mind body and soul to remain in constant touch with each other. We have to remove negative thoughts and create an atmosphere to be happy in our lives.

There are many fear factors that are reasoning us to be unhappy and the main reason being that our heart and our feelings which are more susceptible to fear and worry than the mind. Of course we do the worrying in our minds but it is our emotions that are worried not our brains. When the heart senses the possibility of loss it can start panicking and then uses the mind to worry and many times tries to manipulate the brain in dealing with the fear. The heart desires something and gets excited about it and then it manipulates the mind to assure that it will get it.

Although the brain can control the emotions and knowledge precedes all, however when it comes to response time the brain is slower than the emotions. That is which explains why we say or do things and then regret them. Our objective in life should be to train ourselves to wait for the brain to show up before we say or do anything. Fear usually comes from the emotions and thinking positive is something the brain is capable of doing. So always think positive. It would be very hard to tell someone who is worried to be good and happy by feeling positive. But if you tell them to think positive that is something even a worried person can do.

We need to use our mind to think positive, to think of a positive outcome. Thinking positive brings positive results in its wake; when you react in a positive way to a negative situation you usually get positive in return. Positive mental attitude is effective in many ways. There are limits to the effectiveness of positive thinking.

It is not always enough to change deeply entrenched irrational core beliefs about self, others and the world. When someone does something to us do we think about it in a positive way or in a negative way? Do we try to assume that the person who is not treating us the way we should be treated is themselves in pain and needs our love or do we assume that they just don't like us and therefore we need to respond back in kind? It is therefore a must for us to learn understand and remember that we need to be positive and think positive in the interest of our good happy living.

CHAPTER 25

Positive thinking will generate happiness in you.

If you are interested in getting more happiness, focus on all the ways as if you have already attained success. You need to focus on the thing and create a life within you. If we want to conquer fear, anger and worry we should sit ideal and just think about it. Let our deep worrying do some advance thinking and planning. If we look into our own mind and heart, and we will find nothing wrong there, what is there to worry about and generate unhappiness in us?

Is there anything to be unhappy about?

Practically nothing what is there to be unhappy about? So why worry unnecessarily and make our present and future dark. Discard negative thought think positive and be happy. You must try to make goals.

Making goals can give you a more positive outlook on life. People often tend to get bored with life and get the feeling that they are stuck to negative things which the result they often get the feeling of being depressed. Setting a direction for yourself and a goal would surely help you to move forward. If you expecting to succeed, and are not afraid of failure, you have the best chance of staying positive and can create a very positive life within you. When you, or any of your associates, are tempted to worry about a problem, write out the solution and a definite answer to it. This helps a positive feeling to generate within you.

There are several ways to cultivate a mental attitude.

Another thing you need to understand is that there are several ways to cultivate a mental attitude that can bring you peace and happiness and can carnage a good life within you. More of it if you fill your mind with thoughts of peace, courage, health, and hope, your life will be easy to live. You would get a happy feeling of life and mind if you let yourself to forget your own unhappiness, by trying to create a little happiness for others. You are best to yourself. The perfect way to conquer worry is the Prayer of God. To keep yourself from worrying about criticism, do not even try to get mixed with your enemies, because if you do you will hurt yourself far more than we hurting them. Instead of worrying about ingratitude, let's expect it.

Let's remember that the only way to find happiness is not to expect gratitude, but to give for the joy of giving. Let us build a happy life within us generate peace and a healthy atmosphere around us.

Let us build a happy life within us

This will help us to lead a peaceful happy and prosperous life and we would find ourselves to be happier than before. You should do things in the order of their importance. You need to clear your desk of all papers except those relating to the immediate problem at hand. When you face a problem, solve it then and there, if you have the facts to make a decision. Make a decision fast and do not linger on. To learn to organize, deputize, and supervise and straight away come to decision. Simply postponing it would spoil your good thoughts and there is every likelihood your mind may get into negative activities and start thinking in negative manner. Therefore write down a list of things that make you excited, however big, small, likely or unlikely. Then work to make them occur more often. Look for moments of joy and savor them. Recognize your good happening every day.

Eat well do plenty of exercise and do not skip meals.

It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety so we need to walk, swim, run or whatever we like doing best. Those who create or those who do well on the worst scenario, give themselves worry and stress, tend to be devastated. If we cannot get some sunshine, we can always lighten up our rooms with brighter lights. We can have lunch outside the office. Take frequent walks instead of driving our cars over short distances. No man is indispensable.

First of all our circle of friends is always there to give us some moral support. Spending time and engaging ourselves in worthwhile activities could give us a very enjoyable and satisfying feeling. Nothing feels better than having group support. Good friends are quite important and their company generally lightened up our spirits. To get to know and to find such friends we simply have to be friendly with ourselves, and then the friendships will naturally follow us.

We need to understand the power of touch and support and we have not to underestimate its strength and support. Don't we feel so good when someone pats us on our back and gives us some words of encouragement during your most challenging times and difficult times? Just hug or embrace someone someday you will see that you have almost changed his life. Get intimate with him and try to establish close ties with his family and friends. The love and care expressed by you will tremendously boost him and well as your immune system and fury of worry will be diminished for all.

In our lives storms may come and go.

In our lives storms may come and go. in the form of reversals, but if we have the power and foundation of inner fulfillment and if we deal with it with a very clear practical mind these storms will not kill us or will not disrupt us. There could be numberless reasons for which we keep on worrying.

We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry if we generate within ourselves the power of enlightenment within ourselves. There's no sense in worrying about the negatives if these negatives cannot be changed. If we waste energy and happiness on the things we can't change, we'll only make ourselves more frustrated and come to the stage of depression dejection and disappointments.

Negativity is a habit.

Negativity is a habit and we often don't realize we're doing ourselves down. Under each negative thought that we have written, we can spot an alternative way of looking at it, that isn't so negative. Take your mind to positivity and mold and drive your thoughts to the positivity. There's a world of difference between expecting failure or rejection so as not to be disappointed when it occurs and recognizing it as a possibility of being positive. It's sensible to look at a situation from all angles and to have a back-up plan to fall back on if need be. People who do this will not see failure as another step on the road to eventual success; but by expecting and envisioning success, there's less likely to be a failure. Let us find some ways of removing negative thoughts and discouraging our worries to be born.

Let us all generate and create happiness within us

You may also feel that life has become terrible for you to live and you are carrying no hope that someone would be there to rescue you. Happiness is your own choice and decision. Each of us can be as happy as we make up our minds to be. We can, if we want, fill up our days with positive attitude chatter and laughter. To be happy, we need to concentrate only on happy thoughts. It is a known fact that physical exercise is known to stimulate our veins and get to strengthen our minds that lift depression and anxiety, so we need to walk, swim, run or whatever we like doing best above all we must move ahead in direction where our mind can generate electricity to think in positive directly and bring immense happiness to us.

Difficulties and storms may come and go.

In our lives difficulties and storms may come and go in the form of reversals, but if we have the power of positive thinking and foundation of inner fulfillment we would be able to deal with it with a very clear practical mind and with this positive thinking these storms will not kill us nor will disrupt us. There could be numberless reasons for which we keep on worrying. We may be worried about our health, wealth, loved ones, friends, the happening of yesterday and the follow happenings of tomorrow, the environment or the world politics, but these can be dealt with firm mind and fearless worry if we generate within ourselves the power of positive thinking within ourselves and try to be happy all the time.

The best thing about happiness is that we get it is free.

We don't have to pay or we do not have to open any account to be happy. We don't have to pay monthly rent for it either. WE just have to change our perspective, our views on what we are seeing and feeling. Happiness is not something which is quite readymade. It comes from our own actions and deeds.

Angriness and happiness don't mix.

We must dig out the angriness in us, and see that the happiness has shown and seeded a place to grow its roots. The ultimate goal of life should be to get happiness and not get involved into unnecessary worries falling in the death trap of defeats and failures. The essence of life is not in the great victories and grand failures, but in the simple joys. The purpose of our lives is to be happy.

If you want to be happy, be positive first practice meditation.

Laugh when you can, apologize when you should, and let go of what you can't change. Think positive and just visualize that what is stored in destiny would not be negative. If you want to be happy, be positive first practice meditation. If you want, others to be happy practice compassion. Whoever is happy will make others happy, too.

Happiness doesn't depend on any superficial conditions.

Let us be very sure and let us keep in mind that happiness doesn't depend on any superficial conditions, it is governed by our mental attitude only. Our greatest gift to others is to be happy and to radiate our happiness to the entire world. Happiness is a guide to direction, not a place to hide. As a happy person, we radiate happiness to the world.

We need to visualise our light radiating throughout the world, passing from person to person until it encircles the globe. Resolve to keep happy, and you shall form an invincible host against difficulties.

The path to happiness is forgiveness.

The positive persons often dance to the happy tunes of their lives. The path to happiness is forgiveness of everyone and gratitude for everything. Happiness fills our heart each day and our whole life through with clean thoughts. Any day would be a wonderful day if we do not take life so seriously. Happiness is not about being a winner it is about being gentle with life being gentle within us. Happiness blooms in the presence of self-respect and the absence of ego. Love yourself. Love everyone around you. Love everyone in the whole world. When you're feeling depressed or anxious, close your eyes and try to visualize a guided positive imaginary thing. First breathe deeply and relax. How important it is to consistently reach for positive, uplifting, inspirational thoughts. Thought that promote aliveness and abundance. Thoughts that make you feel good. Imagine that you are already a positive person and you love life.

Happiness can only be achieved if you have a positive mind.

The only thing between us and our desire, to be happy, is one single fact: we are not happy because we often fall into the death trap of depression and wholly because of our negative thoughts. Absence of positive thinking, has eluded us of our great happiness and left us far behind. This very little known fact has kept many of us from reaching our goal of happiness. Throw away all your negative thoughts and worries, concentrate on the goals to be achieved, on the ray of happiness in you and make sure that you are not falling again into the path of negativity. Happiness is a state of mind only and not the thoughts of negatives, and it quite true that happiness can only be achieved if you have a positive mind and a clear attitude of being a positive person. Happiness and positivity go hand in hand. If you are positive you are a happy person and if you possess negativity you would land yourself to be a very negative person thus ruining your life for what of nothing with the result you become an unhappy person and you remain aloof from leading a sweet good and happy living.

CHAPTER 27

STOP WORRYING AND START LIVING

At time we may think that there is no road is left for us from where we can achieve the happiness of our lives. We may also feel that life has become terrible for us to live and we are carrying new hope that someone would come to rescue us. There may be chances that someone who was there with us before might have held on to us when we were on the dark side of the life.

It is important for us to stay open to laughter and humor.

Even when we are facing challenges, it is important for us to stay open to laughter and humor. Sometimes, simply recognizing the potential humor in a situation can lessen our stress and brighten our outlook. Seeking out sources of humor such as watching a funny sitcom or reading jokes online can help us to think more positively. The experience has taught us that we should buy some strength, hope and positive ness from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments and live with considerable optimism. Happiness in life comes through the doors of positive thoughts; we do not even realize which one is left open.

We have so many reasons to cry and at the same time plenty of reasons to smile as well.

Keeping our dreams and hope alive might be a reason that success and happiness will come our way again. We ought to know that happiness alone does not stand for anything, but it is on our way of thinking that how do we keep ourselves happy in life. Ending up our lives does not lead us to our destination but of course proves we are supposed to be cowards who know not to unfold the doors of belief in God and in ourselves. But if our faith is strong enough we will not be let down, rather we would break the knees of sorrows and force it to die and lead happy lives.

We must find out ways to come out of our worries, anxieties and difficulties.

We should not surrender but must find out ways to come out of our worries, anxieties and difficulties. We ought not to indulge ourselves into the darkness of the room but find out the doors to free ourselves from unnecessary fear and worries. We must belief in ourselves and our hearts, and believe in the ones who love us and not the ones whom we love. We must not fall on the negative side of a thing. It is the real time when we keep on revealing the truth of our lives and relations. We should always try to be happy and should think that whatever is happening, it is the positive side. We should accept the situation and fight it with more determination. We must find out ways to come out of our worries, anxieties and difficulties in order for us to lead a happy sweet and good life.

Negative thoughts are our greatest enemies.

We ought to know that advice from people around us will help us to overcome from the any drastic situation.

Also we have to always minimize the stress as it gives nothing but takes away joy and happiness from our lives. And finally we need to take things casually and fight with it seriously. A clear minded person looks for good qualities in the other person, whereas a negative mind always looks for the fault in the other person, whereas a negative mind always looks for the fault. An optimist goes forward keeping in mind the past, a pessimist thinks of the future and reverts back to the past. In fact negative thoughts are our greatest enemies. Experience the happiness in all circumstances by maintaining better relationships.

We need to analyse the reason for our unhappiness.

Whenever we are unhappy, if we analyze the reason for our unhappiness, it is because life is not matching our desires and expectations. We need to know and realize that nobody is perfect or flawless. If we try to change the way we look, talk and behave just to please others, and show our pride we will gradually become such a person that we ourselves won't recognize each other and would start and create unnecessary worries within us and our surrounding without being positive and will not start to live happily. We ought to stop worrying over unnecessary things be positive and live without fear. Living happily is the master key to all problems and worries. Forget worries discard all problems take them lightly and behave as nothing serious has happened. This way we are sure to overcome all problems and lead a happy life.

We need to understand that what people think of us is their concern, and not ours. If they think about us to be, too reticent or proud, it's really not our business. If every time we happen to meet some new fellows, we may wonder and imagine as what they think of us, and with this feeling in us we will never be able to live a trouble-free and hassle free life. We are bound to fall into the trap of unnecessary worries denying us the startup of new and the happy living life.

Positive attitude is a quality of happy living.

We must think rationally. Is it in our hands or can we control what others think about us? Simply we need to ignore them, if we cannot, and live our lives the way we want to and find the ways to leave worries aside and start living a happy life. Let us make our way to happy living. It is a well-known fact that attitude decides how a natives or persons copes up with the day to day events of life. Attitude is the main influence a person's reaction to a situation in life. It sets the emotional undertone for a person to his likes or dislikes a situation even before he is acquainted with it. Positive attitude is a quality of happy living which is second to none in a human being.

We acknowledge our children to say a big thank you from the time to time irrespective they being very little, we teach them to be grateful for everything that they receive. We attach so much importance to this attitude of gratitude that when our children fail to thank someone, we insist that they do it. That is what is needed to be avoided from time to time. We expect this in return from others when we help them or give them a gift. We call a person discourteous and rude when they do not say thank us in return. Though we attach so much importance to this attitude, as we grow into teenage and adult years we find ourselves becoming ungrateful or taking things for granted.

We lose touch with the very same qualities that we instill in our children. We take for granted our life, our health, our families, the people in our lives, the things that our loved ones do for us to make our lives easier and things that we possess.

The attitude of positive or happy living speaks a lot about a person.

It denotes about changing negative attitudes and making positive thinking a positive a good habit. Thinking positively and a positive attitude help us to appreciate and value ourselves, our potential and all that we have. It ensures that we do not take our abilities for granted. It makes us look at ourselves as special people with a special set of abilities and potential. It banishes the feelings of inadequacy and insecurity that arises from unfair comparisons with others. It helps us to appreciate people for who they are and not magnify what they are not and their little flaws.

It drives away prejudice and makes us approach life with an open mind. It predisposes us to react to the daily events of life in a positive manner and help us to look at the brighter side of life. Make us optimistic. It gives hope and helps us look forward to life with anticipation making our lives happier and happier day by day.

We need to know that positive thinking takes the focus away from what we don't have, to appreciating and making good use of what we have. It is closely connected to our emotional wellbeing and happiness. We feel loved and at peace with ourselves for a major part of our lives when we make this attitude ours. This adds and helps us to get rid of greed, amenity, bitterness, jealousy, and promotes a healthy and nurturing attitude towards others, which in turn gets reciprocated and we feel the sense of healthy living.

On the face of it we ought to know that a positive and good living is an attitude that makes you feel good about who you are, this attitude impels you to utilize all that you are endowed with as a person, to achieve the highest possible goals. The best part of adopting the 'positive thinking and a positive attitude of gratitude is that, you will be able to enjoy the smallest pleasures of nature with a heightened sense of satisfaction and awe. We can see and watch a beautiful flower and carry that joy in our mind for future enjoyment with a clear positive habit. We can go back to work freshen and can use it as an object to meditate on when we feel stressed. When we have this attitude, we are able to work without any external pressure to perform but there is sufficient pressure and motivation from within.

CHAPTER 28

DON'T CREATE UNHAPPY LIVING

learn to swim out of the sorrows.

It is a common fact that no one in this world is free of obstacles or difficulties. If all the openings of happiness are shut for us and we have to overcome that and have no way to come out, but to survive lest we must have to learn to swim out of the sorrows because this is what is called life and sorrow free living. There are lot more examples and in many other situations, where we will find that how we could have faced and fought with our sorrows and difficulties of life when there was no hope left in our lives.

Survival is what is needed at odd intervals.

Once we start thinking more positively and happily, we will realize that we had to reinforce these thoughts and behaviors within ourselves so that we could stick to it. As with any sort of training, the more we practice, the better we get to be positive. The best and easiest way to do this is to be positive when it comes to who we are. We need to speak to ourselves that we are awesome. And we have done a good job at work thus creating positivity within us. We need to be honest with ourselves, and we need to do our best to look for the good.

And, whatever we do, we must not focus on the negative but focus as to how we can become happy by discarding all negative thoughts and have the feeling to remain happy and gay. It is alright not to like everything about ourselves, but don't focus on what we don't like. We have all the positive attributes, and it's up to us to remind ourselves of them every day in order to make us to live happily in our lives.

Life is such a special gift of Almighty so always be happy

Life is such a special gift of Almighty and it is not gifted by Him to use it the way we like or love to. The actual path shown by Him needs to be followed by us for us to reach the peak of betterment every moment. We need to have some happy attitude to look at it comfortably but at the same time having a positive mental attitude does not mean banishing all negative thoughts and people from your life. The same is true with thoughts. When we go to field with negative thoughts, we banish one and another one arises. Therefore creation of positivity and creation of happiness in life is utmost necessary to enjoy the special gift of God to us.

Do not create unnecessary worries.

If we try to change the way we look, talk and behave just to please others, and show our pride we will gradually become such a person that we ourselves won't recognize each other and would start and create unnecessary worries within us and our surrounding without being positive and will not start to live happily. Thus we must behave in such a manner so as not to create unnecessary worries in our thoughts and mind. We ought to stop worrying over unnecessary things be positive and live without fear happily.

We need to understand that what people think of us is their concern, and not ours. If they think about us to be, too reticent or proud, it's really not our business. We are bound to fall into the trap of unnecessary worries denying us the startup of new and the happy living life. We would not be able to lead a sweet good and happy life.

The main reason is that we must think rationally. Is it in our hands or can we control what others think about us? Simply we need to ignore them. If we cannot, and live our lives the way we want to and find the ways to leave worries aside and start living a happy life. Let us make our way to happy living.

Happy Living with Positive Attitudes.

Positive thinking is not about putting on a pair of rose-colored glasses and ignoring all the negative things you will encounter in life. That approach can be just as devastating as ignoring the positive and only focusing on the negative. Balance, with a healthy dose of realism, is the key. It is a well-known fact that attitude decides how a natives or persons copes up with the day to day events of life. Attitude is what a influence a person's reaction to a situation in life is.

This is an attitude that makes you feel good about who you are, what you do, and what your potentials are. This attitude impels you to utilize all that you are endowed with as a person, to achieve the highest possible goals.

Keeping our dreams and hope alive our success and happiness.

We should not forget that happiness in life comes through the doors of positive thoughts; we need to have them first. If one door happen to close, another opens, in the event only when we are confident and optimistic. We have so many reasons to cry and at the same time plenty of reasons to smile as well.

Similarly, happiness does not stand for anything, but is on our way of thinking that how do we keep ourselves happy in life. Failure and disappointment are part of our life. The only thing is that we need to face and solve the problem is by keeping our dreams and hope alive be it a reason that success and happiness will come our way again. The experience has taught us that we should buy some strength, hope and positivity from our loved ones to help ourselves in such a situation rather than surrendering as life is a precious gift of God and is equipped with full of joy and happiness if we help ourselves in these critical moments we can live with considerable optimism.

Life is there, where there is hope.

What if when everything goes wrong and all the doors of happiness are closed our live becomes a silent. It is a quite common and we are aware of a marvelous proverb that Life itself is a stage and we all are the performers, performing different acts assigned to us by our almighty power. We should always remember that, “Life is there, where there is hope”. That single thing that remains in our hands is to find out ways to know how to overcome these worries of our life at that very moment when all doors are closed for us which means that whatever situation is there, we must not give up hope. We must fight because there have been always a chance that with good faith and hard work we can turn the odds in our favor. It is often said that it is very easy to advice but when it comes to us, things go out of our control and we fail to suggest a way out for ourselves.

We fall into the trap of unnecessary worries and elope ourselves with negative thoughts. We feel better when somebody else is facing some difficulty but when it comes to us we fail to gather that faith, will power and the words of strength. When the power of will is at the worst and each one of us knows that the one who is gone never comes back. Neither a thousands of words would not be enough to bring him back nor a million tears, because each and every moment, eyes would only shed tears , mind would remain tensed and we would be simply surrounded by worries and the life seems to have been vanished.

Life is ever expanding, contraction is death. As commonly said by big saints that the self-seeking man who is looking after his personal comforts and leading a lazy life for himself there would be no room for him even in the hell and he simply have lost the power of his will. We are quite aware of the fact that faith in oneself is the history of a man and that faith calls the quality of superiority within a person. One cannot do anything without it. We fail only when we do not try very hard to achieve the power and faith within us. As soon as we lose faith, death comes in our way and we are surrounds by all the evils and stupid worries of the world.

The secret of every successful man is to have, good confidence, faith and strength

The secret and history of every successful man is to have, good confidence, faith and strength behind him and that remain the right cause of his single success in life. Unselfishness plays a very vital role in his life. He may not have been perfectly unselfish, yet he was tending towards it. If he had been perfectly unselfish, he would have been as great a success. The degree of unselfishness marks the degree of success everywhere and he leads to be successful man without fear worries and selfishness.

There are quite a number of reasons to believe that for a successful and happy life the mystery surrounding it lies in our interests, and good memory which is the basis of our interest, power of desire and aim, keeping ourselves smiling and the doubt free character which is the foremost important reason for a successful and happy life. If we possess one solid unselfish and doubt free character within ourselves we would be quite happy and successful.

The love for God and worshipping.

The love for God and worshipping God adds to one common thing the immense faith in Him. There may be different beliefs and ways to worship God in different communities, places and religions, but one thing remains the same and that is the Love of God for all of us. Our world is full of odds and evens, happiness and sorrows, fulfilment and emptiness. And these are all created by the Almighty. However, the most beautiful Gift of God, is a Human, which is such a mystery driven by Him which could hardly be defined or explained in depth.

The secret of successful and happy life lies in keeping ourselves smiling.

The secret of successful and happy life lies in keeping ourselves smiling and the character which is the foremost important reason that lies within us. Do not be curious about anything, but in everything, by prayer and petition, with thanksgiving, present your requests to God. Whenever your mind is tempted to jump the fence and start to worry, say this verse aloud or to yourself. You may even have to repeat it over and over again.

Steps for a successful and happy life.

Being a positive thinker is not about ignoring reality in favor of aspirational thoughts. It is more about taking a proactive approach to your life. Instead of feeling hopeless or overwhelmed, positive thinking allows you to tackle life's challenges by looking for effective ways to resolve conflict and come up with creative solutions to problems.

Life is not a bed of roses.

Life is a battle field and not a bed of roses as every man on earth has to struggle very hard in making his life happy. If aim of our life is to stay happy and let others to be happy, we will be happy and remembered by all. But no one will actually remember us for the wealth we have gained, or success we have achieved. If we have no aim in life, we would not be able to lead and happy life. Living with no purpose in life is just like a feather moving towards the wind. Both career and purpose are different issues but it is equally important to understand the value of these things which would ultimately add spicy flavor to your living.

Innovation at work place is what is it necessary how well we judge our work, how good we like and enjoy it. If we take our work as a stiff challenge and as learning everyday then we would start loving it and giving our best. However, if we just work for the sake of then nothing is realized and we do not remain happy in life.

We should not aim to have negative thoughts at all.

Now let's us imagine that we are not feeling at our best today, and we are having thoughts that could be classified as negative. We shouldn't be thinking such negative thoughts. We don't like the negative thoughts. We ought to know that negative thoughts are stressful, demoralizing and depressing. We shouldn't aim to have negative thoughts at all. Often we feel uncomfortable because we think we have to say or do something in response to another person's words.

When we find ourselves thinking this way, it helps enormously to take a few moments to check inside and notice what we are feeling. Negative thoughts destroy our happy livings. We ought to discard all these negative thought and act to live in a more positive atmosphere rather than living in a negative world where we can never find a happy living.

CHAPTER 29

LEAD A HAPPY LIFE

It might not be easy, but the positive impact it will have on our mental, emotional, and physical health will be well-worth it. At times we may think that there is no road left for us from where we can achieve the happiness of our lives. We may also feel that life has become terrible for us to live and we are carrying new hope that someone would come to rescue us. There may be chances that someone who was there with us before might have held on to us when we were on the dark side of the life.

What if when everything goes wrong and all the doors of happiness are closed our life becomes a silent. It is a quite common and we are aware of a marvelous proverb that Life itself is a stage and we all are the performers, performing different acts assigned to us by our almighty power.

We should not forget as to what is in our possession, if it is to fulfill our duties towards our responsibility and do whatever is correct and is allowed by us in our life? We should not forget that happiness in life comes through the doors of positive thoughts; we need to have them first. If one door happens to close, another opens, in the event only when we are confident and optimistic. We have so many reasons to cry and at the same time plenty of reasons to smile as well.

Smiling and the doubt free character which is the foremost important reason for a successful and happy life.

There are quite a number of reasons to believe that for a successful and happy life the mystery surrounding it lies in our interests, and good memory which is the basis of our interest, power of desire and aim, keeping ourselves smiling and the doubt free character which is the foremost important reason for a successful and happy life. Often we feel uncomfortable because we think we have to say or do something in response to another person's words. When we find ourselves thinking this way, it helps enormously to take a few moments to check inside and notice what we are feeling. We are deeply depressed that negativity has governed us and has taken a deep root in our minds. So, let's imagine that you have chosen to focus on your negative thinking with regards to school.

Evaluating thoughts can generate happiness within us.

The next step is to spend a little bit of time each day evaluating your own thoughts. When you find yourself thinking critical thoughts about yourself, take a moment to pause and reflect. While you might be upset about getting a bad grade on an exam, is berating yourself really the best approach? Is there any way to put a positive spin on the situation?

While you might not have done well on this exam, at least you have a better indication of how to structure your study time for the next big test. However, despite of all these good thoughts which are embodied to us by the almighty fail to revive these unwanted circumstances that lead us to sorrow and difficulties and a situation where we do not know what is correct and good for us and what is wrong for us.

Life is there, where there is hope.

We should always remember that, "Life is there, where there is hope". That single thing that remains in our hands is to find out ways to know how to overcome these worries of our life at that very moment when all doors are closed for us which means that whatever situation is there, we must not give up hope. Happy living allows us to tackle life's challenges

We fall into the trap of unnecessary worries and elope ourselves with negative thoughts. It might not be easy, but the positive impact it will have on our mental, emotional, and physical health will be well-worth it. It takes practice; lots of practice.

This is not a step-by-step process that we can complete and be done with. Instead, it involves a lifelong commitment to looking inside ourselves and being willing to challenge negative thoughts and make positive changes. It is a common fact that no one in this world is free of obstacles or difficulties. If all the openings of happiness are shut for us and we have to overcome that and have no way to come out, but to survive lest we must have to learn to swim out of the sorrows because this is what is called life and sorrow free living.

However, the most beautiful Gift of God, is Human, which is such a mystery driven by Him which could hardly be defined or explained in depth.

If aim of our life is to stay happy and let others to be happy, we will be happy and remembered by all.

We know that life cannot be foreseen. Life is not a bed of roses. Life is a battle field and not a bed of roses as every man on earth has to struggle very hard in making his life happy. But no one will actually remember us for the wealth we have gained, or success we have achieved until and unless we do not live a happy life. Life is such a special gift of Almighty and it is not gifted by Him to use it the way we like or love to. The actual path shown by Him needs to be followed by us for us to reach the peak of betterment every moment. We need to have some positive attitude to look at it comfortably but at the same time having a positive mental attitude does not mean banishing all negative thoughts and people from your life.

We need to believe that a positive attitude is a choice. This step is hard to take. People are either positive or negative. They tend to blame their negativity on all kinds of outside forces fate, experiences, parents, relationship, but never really stopped to think that they could choose to be positive. Piercing ourselves that positivity is a choice has been one of the greatest things we have ever done for ourselves. Now when we find ourselves in a bad situation, we know that it's up to us to find the good, to be positive regardless of what's happening around us. We should no longer point fingers and place blame to anyone else. We need to realize that everything happens how it happens, and it's up to us to choose how we want to feel about it. We need to be in control of our attitude, and no one can take that away this from us. If we want to live a positive, joyful and happy life, we must not be surrounded by negative people who don't encourage our happiness. As a negative person, we ought to get attracted too negative people only.

Only when we decide to make the change to live a more positive life, we have to get rid of our lives of the most negative influences in it. We are quite aware of the fact that no one is perfect and perfection isn't the goal when it comes to positivity but there were people in our lives who were consistently negative, who constantly bring us down, we need to stop spending so much time with them.

We can very well imagine, it is not easy for us to get away from these negative people.

It can hurt us to keep distance from people even when you know they aren't good for us and for our current lifestyle.

In addition to removing negative influences from them, we also have to get rid of some of our own negative behaviors, such as the drug and alcohol abuse.

We need to take some concrete steps and examine which behaviors are good for us and which were not harmful. What we need is to learn to focus on the positive things, such as working on positive activities and cultivating new, positive relationships. We must let go of the negative ones. This process may be not easy to live a positive life when negative people and behaviors continually pull us down. In every situation or in every person there is something good.

Anything good and bad is learning experience.

Most of the time it's not easy to find the positive qualities but we have to look hard to discover positivity in them. Now, when we are faced with a difficult or challenging situation, we need to think and talk to ourselves and console our mind, no matter how terrible the situation might seem, we can always find something good if we take the time to think about it. It is quite obvious that anything good and bad is learning experience so, at the very least, we must learn from bad experiences. However, there's usually even more to it than that.

If you really take some time to have a look at it, we would find something good, something genuinely positive, about every person or situation. Not only do we need to be happy with ourselves for this multiple action to take effect, but we also need to be more positive and happy with others. We have to share our wealth of happiness with the people of the world. The best way is to be nice with other people, no matter what. Tell them that they look nice today.

Appreciate their job and tell them that have done a great job on that assignment. Be happy and tell your elder or your kids how much you love them and how great they are. When someone is feeling down, do what we need to do is to cheer him or her up. Do send them gifts nice flower and glow them with nice notes. By doing this we will not make ourselves happy but in turn give and generate happiness for others too.

At times we may suffer from chronic depression, though we know how good things look on to others life cannot be worse for us. Let's imagine how to deal when life leaves a great big steaming pile at our doorstep. Lest we need to remember that external factors can be dealt with by taking positive and happy steps to repair or at least address the root of the problem as best as we can. Whatever may be the primary cause of the problem, that cause must be examined first?

What is required is that we never wanted to see the good in ourselves and, therefore, didn't want to see it in others also. We must not be critical and condescending rather we must be encouraging and supportive. We should not try to treat others as we would like to be treated, but also try to consider how we would like to be treated.

The world likes to appreciate positivity, and the more we share it with others, the more we would be practicing it your own lives. When we start feeling like the idea of not being a happy person we need to remind ourselves that all it takes is one tiny step in the right direction to move towards a more happy life.

Share your happy thoughts with others

We have to believe in ourselves and remember the most important lesson of all is a happy outlook and that is a choice that we can always make. The power of remaining happy, whatever the situation, can never be underestimated. We are all here for a short duration, but is it worth it to spend any of that time in a any angry or being negative? That need to sort out in mind and soul and thus must share our happy thoughts with others.

The real test of any one is to remain happy whenever some challenges become difficult. Remaining happy keeps our mind in the right state of balance and often opens resolutions to the problems at hand. Negativity is contagious and spreads like fire. It not only does its affect anyone, but it spreads to everyone who ever comes in contact with it or whoever they interact with.

When only the negative perspective is in focus, the resolution process is impeded. Eliminating negativity, or rather, being positive is a mindset that can be found at any moment, and which can be turned into a habit. We must throw away the negativity in us and opt for being a very positive person this in turn will make us happy and we would be able to lead a sweet and happy life forever.

CHAPTER 30

MAKE YOUR WAY TO HAPPY LIVING

The secret of successful and happy life lies in keeping ourselves happy

We need to learn a lesson from every situation. No matter how difficult the situation may appear. We should recognize the beautiful lessons waiting to be discovered. Sometimes lessons may prove to be expensive and costly, but every problem is a learning experience in disguise. We need to be conscious of our thoughts, especially, when life just isn't going our way. The moment we see that we are diving into frustration, agony, sorrow or low self-esteem we must shift our thoughts, by thinking about something completely different and unrelated.

You are essentially trying to cultivate a new habit here, the secret of successful and happy life lies in keeping ourselves smiling and the character which is the foremost important reason that lies within us.

Whenever your mind is tempted to jump the fence and start to worry, say this verse aloud or to yourself. You may even have to repeat it over and over again. Am I constantly striving to see the positive in every aspect of my life? Steps for a successful and happy life.

MAKE YOUR WAY TO HAPPY LIVING

We need to believe that a happy living is a matter of our choice. This step is hard to take. People are either positive or negative. They tend to blame their negativity on all kinds of outside forces fate, experiences, parents, relationship, but never really stopped to think that they could choose to be happy. Piercing ourselves that happiness is a choice has been one of the greatest things we have ever done for ourselves.

Now when we find ourselves in a bad situation, we know that it is up to us to find the good, to be happy regardless of what is happening around us. We should no longer point fingers and place blame to anyone else. We need to realise that everything happens how it happens, and it is up to us to choose how we want to feel about it. We need to be in control of our attitude and happiness, and no one can take that away this from us.

Unhappiness is contagious and spreads like fire.

It not only does its affect anyone, but it spreads to everyone who ever comes in contact with it or whoever they interact with. When only the negative perspective is in focus, the resolution process is impeded. Eliminating unhappiness, or rather, being happy is a mindset that can be found at any moment, and which can be turned into a habit. If we want to live a happy, joyful life, we must not be surrounded by negative people who don't encourage our happiness. As a negative person, we ought to get attracted to negative people only. What we need is to learn to focus on the happy things, such as working on positive activities and cultivating new, positive relationships. We must let go of the negative ones. This process may be not easy to live a positive life when negative people and behaviors continually pull us down. We need to discard all of them to lead a happy and sweet life. An art of sweet living lies below us we have only to recognize it.

Look For Sweet Living in Life

The real test of any one is to remain happy whenever some challenges become difficult. Remaining happy keeps our mind in the right state of balance and often opens resolutions to the problems at hand. We must throw away the unhappiness in us and opt for being a very positive person. In every situation or in every person there is something good. Most of the time it's not easy to find the happiness qualities but we have to look hard to discover happiness in them.

If you really take some time to have a look at it, we would find something good, something genuinely happy, about every person or situation. We must look for sweet living in life

Get Sweet feeling in your life

Once we start thinking more in a happy manner, we will realize that we had to reinforce these thoughts and behaviors within ourselves so that we could stick to it. As with any sort of training, the more we practice, the better we get to be happy. The best and easiest way to do this is to be happy when it comes to who we are. We need to speak to ourselves that we are awesome. And we have done a good job at work thus creating happiness within us. We need to be honest with ourselves, and we need to do our best to look for the good. And, whatever we do, we must not focus on the negative. It is alright not to like everything about ourselves, but don't focus on what we do not like. We have all to get the sweet feeling in our lives, and it is up to us to remind ourselves of them every day.

Share sweet and happy thoughts

Not only do we need to be happy with ourselves for this multiple action to take effect, but we need to be more happy with others too.. We have to share our wealth of happiness with the people of the world. The best way is to be nice with other people and to make them happy, no matter what the matter is. Tell them that they look nice today.

What is required is that we never wanted to see the good in ourselves and, therefore, didn't want to see it in others also. We must not be critical and condescending rather we must be encouraging and supportive. We should not try to treat others as we would like to be treated, but also try to consider how we would like to be treated. This will strangle the pattern of self-pity, mind-created imaginations, and negative downward stairs. Really what makes us different from other mammals is our ability to control our thoughts and think for ourselves happiness and shift our unhappy thoughts to a happy feelings and to happy living. We may have made mistakes, but now we can accept it and continue, knowing that we will make a different decision in the future. If we understand this it can be appreciative for the experience. We cannot be both angry and grateful at the same time. We should start counting the blessings and miracles in our lives and if we start exploring for them and we would find more happiness in doing so.

Feeling good about ourselves and showing self-confidence.

Feeling good about ourselves and showing self-confidence boosts our skills potential and capabilities in any areas of work and supports us to become happier. We need to shift our thoughts from being a unhappy person to more strong and positive man. Also keeping in mind that pushing things to the limit and going beyond what we think is possible for us to get to the next step of being happy. It becomes another key to achieving what we really want to do. We only want happiness and want to lead a happy life.

Even if it may even be relationships and we are finding it difficult to meet someone where we are actually interested in, we need not wait because it usually doesn't come to us by own, we must stand up to get help from any learned fellow. One of the most important things while doing all of this is to be happy about what we are doing, thus we ought to have a successful goal setting our lifestyle with a happy attitude.

We may or may not be able to solve the problem of unhappiness that lies within us, but at least knowing that we are taking positive steps that can help us improve our happiness. It will not be easy, of course, for us and it may be like suffering a chronic disease thus we must balance ourselves as "being happy" with an understanding that the reality is, it is going to be an ongoing battle for our own survival.

Depression will undermine even the strongest of wills, need help to maintain or at least be reminded of a happy outlook and happiness that is prevailing within us. Counseling, psychotherapy, and the right combination of medication will play a crucial role in helping to keep us from sinking into that very dark place that is the essence of depression and unhappiness. Be patient, but don't look for miracles. It may be that we will need the help of professionals throughout our lives to maintain a generally even keel. If one could "will away" depression, there would be no need of doctors or drugs.

What we can do is understand why we feel like we do, and explain to our counselors that we wish it were that easy, and that we appreciate our concern towards being happy persons. Shifting our thoughts enables us to the right path of our happiness and thinking in its direction of positivity can make us to lead a very happy life.

CHAPTER 31

BE HAPPY- HAVE SWEET LIFE

We need to remember that as possibly as we can we should make it a point to eat a more balanced, and healthy diet even though we may very little money left with us. We have to take lot of greens vegetables and with variety of fruit and nuts which are all super healthy food for us, and which are more or less expensive than meats, cheeses, and processed foods. Their nitrifying value will energize and elevate our body, and knowing this that we are treating ourselves will surely refresh our minds and make us to lead a happy life.

If we look for rich food rich in vitamins and other useful ingredients which include nuts, soya beans and fatty fish we would get more nutrition value. We must cut back on the caffeine drinks, alcohol. We don't have to quit, but reducing the intake of them will help reduce anxiety and stress from time to time thus making us to have more comforts leading to a happy and sweet life.

A positive person anticipates happiness, health and success.

We need to change our attitude from negative thinking to positive thinking and converge ourselves from negativity to positivity.

Positive thinking is a mental and emotional attitude that focuses on the bright side of life and expects positive results. A positive person anticipates happiness, health and success, and believes he or she can overcome any obstacle and difficulty.

No matter how difficult the situation may appear. We should recognize the beautiful lessons waiting to be discovered. Sometimes lessons may prove to be expensive and costly, but every problem is a learning experience in disguise. We need to be conscious of our thoughts, especially, when life just is not going our way. The moment we see that we are diving into frustration, agony, sorrow or low self –esteem we must shift our thoughts, by thinking about something completely different and unrelated and always try to bring happiness in our lives irrespective of all the problems that we have been facing and are aware of it.

UNHAPPY LIVING IS MISERABLE

We affect, and are affected by the people we meet, in one way or another. This happens instinctively and on a subconscious level, through words, thoughts and feelings, and through body language. Is it any wonder that we want to be around positive and happy people, and prefer to avoid negative ones? People are more disposed to help us, if we are positive and happy, and they dislike and avoid anyone broadcasting unhappiness. Negative thoughts, words and attitude, create negative and unhappy feelings, moods and behavior. When the mind is negative, poisons are released into the blood, which cause more unhappiness and negativity.

This is the way to failure, frustration and disappointment and unhappiness comes gushing in our minds. Individuals with a pessimistic explanatory style often blame themselves when bad things happen, but fail to give themselves adequate credit for successful outcomes. They also have a tendency to view negative events as expected and lasting.

As you can imagine, blaming yourself for events outside of your control or viewing these unfortunate events as a persistent part of your life can have a detrimental impact on your state of mind. Positive thinkers are more apt to use an optimistic explanatory style, but the way in which people attribute events can also vary depending upon the exact situation. This will strangle the pattern of self-pity, mind-created imaginations, and negative downward stairs.

What makes us different from other mammals is our ability to control our thoughts.

What makes us different from other mammals is our ability to control our thoughts and think for ourselves positively and shift our negative thoughts to a positive angle. We may have made mistakes, but now we can accept it and continue, knowing that we will make a different decision in the future. If we understand this it can be appreciative for the experience. We cannot be both angry and grateful at the same time. We should start counting the blessings and miracles in our lives and if we start exploring for them and we would find more. It's quite true that we are alive and breathing!

We have to realize how lucky we are with all the happiness in abundance in our lives. Our mind and body becomes dumb and mum when it comes to pressure, all it wants to do is take the easiest way out and to throw out of us our negative within us making us to forgo happiness and adopt unhappiness in life. While the terms happy living and positive psychology are sometimes used interchangeably, it is important to understand that they are not the same thing.

First, happy living is about looking at things from a positive point of view. Positive psychology certainly tends to focus on optimism, but it also notes that while there are many benefits to thinking positively, there are actually times when more realistic thinking is more advantageous. Feeling good about ourselves and showing self-confidence boosts our skills potential and capabilities in any areas of work and supports us to become happier a person.

We need to shift our thoughts from being a negative person to more strong a positive man. Also keeping in mind that pushing things to the limit and going beyond what we think is possible for us to get to the next step of being a happy man. It becomes another key to achieving what we really want to do.

Smiling laughing is the best medicine to a sweet living.

Yes all these are the best medicine. Based on the same concept above about smiling, laughing burns calories, increases our adrenaline and boosts health. There are even groups of people that get together just to laugh together. They are not laughing at jokes, they are just laughing for good health. As with smiling, we do not need to laugh at real things, we just need to do the physical laughing for all of the health benefits. Even small amounts of exercise make us feel better.

Let us take a walk if we are feeling bluesy, angry or slipping into negative thinking. We would have had someone tell us to "look on the brighter side" of any situation or problem disturbing us. Even if it may be relationships and we are finding it difficult to meet someone where we are actually interested in, we need not wait because it usually does not come to us by own, we must stand up to get help from any learned fellow to guide us to a sweet and happy living.

Most important thing is to be happy and feel happy.

One of the most important things while doing all is to be happy about what we are doing, thus we ought to have a successful goal setting our lifestyle with a positive attitude. At times we may suffer from chronic depression, though we know how good things look on to others life cannot be worse for us.

Let's imagine how to deal when life leaves a great big steaming pile at our doorstep. Lest we need to remember that external factors can be dealt with by taking positive steps to repair or at least address the root of the problem as best as we can. Whatever may be the primary cause of the problem, that cause must be examined first? We may or may not be able to solve the problem, but at least knowing that we are taking positive steps can help us improve our outlook.

It will not be easy, of course, for us and it may be like suffering a chronic disease thus we must balance ourselves as being happy with an understanding that the reality is, and is not going to be an ongoing battle for our own survival. Depression will undermine even the strongest of wills, need help to maintain or at least be reminded of a positive outlook.

Counseling, psychotherapy, and the right combination of medication will play a crucial role in helping to keep us from sinking into that very dark place that is the essence of depression. Shifting our thoughts enables us to the right path of our happiness and thinking in its direction of happiness can make us to lead a very happy life.

Exercise is one of health sport that our body needs most.

It may be yoga, cross training, or even a simple walking in the park. This helps keeping our body active and will also help to grow our outlook. If we make it hobby we would enjoy the most. Whether its art, photography, music focusing on something other than the worry factor it will give our mind some good atmosphere to breathe off and would generate a good behavior within us.

The other refreshing factor is naturally our sleep. We need not be reminded of this. Our body is probably begging us for it when we are in the middle of hard times. We may be drawn to maintain good sleeping habits. Maintain a consistent sleep schedule, but allow yourself some leeway. If we sleep peacefully let our body get about good hours of sleep we get the best results this in turn will lean us to lead a happy and sweet living instead of disturbed life.

If we are starting to have those unhappy thoughts, we need to speak to our physician or our therapist. They may prescribe something to help steer us back to the center, emotionally. It may be the act of talking about it is therapeutic enough, but don't assume that. Let us leave that call to the professionals. Having goals which are set again and again after each one is achieved will give us a mindset or target to strive for which leads to success, with success becomes natural happy attitude. With all costiveness, goals and success build a higher potential and belief within ourselves. Setting realistic goals that we know we can achieve by staying positive is a great beginning to a happy living.

We need to realize that what appears negative today will change tomorrow.

Nothing stays the same. Whether we are happy or unhappy, the situation does not change. Our attitude around our friends, family and people really tells them as to who we are and also being happy instead of unhappy makes an excellent first impression on anybody. Happiness means to be absolute, clear-cut, definite, forward looking and expressively firm with a decision. Having a happy attitude toward something means we are willing to commit and do the work without complaint, which leads to goals of happiness and sweet living.

If a problem is fixable, and if a situation is such that we can do something about it, then there is no need to worry. If it is not fixable, then there is no help in worrying. There is no benefit in worrying whatsoever. If we have a problem, the thing to do is to communicate: find out the information we need to get the full picture, so that the solution becomes apparent.

If we are upset, we need to communicate and say how we feel. If we have done something wrong, again we need to communicate. The nature of this world is that we have to face birth, old age, disease and death. Everything is always changing. The biggest problem is that we want to control our environment to our own wish and will and in turn remain unhappy since we are not able to achieve it even after all the efforts are put in to lead a happy life.

We must not hold on to anything that bothers our mind.

It can only hurt our health and it won't help our problems at all. The people that live the longest in this world do not hold grudges or hold onto negative feelings. We need to visualize our worries on a large chalkboard in our mind. Watch yourself take a big eraser and erase the problems. Every time the thoughts come back into our head, we need to see ourselves with the eraser again.

Let us keep our slate clean. Unnecessary worry does not empty tomorrow of its sorrow, it empties today of its strength and tends to make us unhappy all the time. Worrying does not empty tomorrow of its sorrow, it empties today of its strength. If we are worried about the future. Life is what we make it, so make it a happy one. We need not worry on things that may not happen, life is too short to worry too much. Smile and be happy and start living a sweet and happy life.

Recent studies have shown that smiling can increase our good health. We receive the same benefits whether we feel like smiling or not. Smiling also benefits everyone that sees it. Smiling at others makes them feel good too.

So smile, fake or not, it is good for us and good for our recipient. It is the best medicine. Based on the same concept above about smiling, laughing burns calories, increases our adrenaline and boosts health. There are even groups of people that get together just to laugh together. They are not laughing at jokes, they are just laughing for good health. As with smiling, we do not need to laugh at real things, we just need to do the physical laughing for all of the health benefits. Even small amounts of exercise make us feel better. All this tips help us to maintain a good happy and sweet living.
